Set the secondary appraised by the application (see options below), replace the first cone, and apply power to the system. Keep watching after the LED stops flashing (see the LED operation section). Walk through the detection zone, observing the sensor's LED whenever motion is detected. The red LED shows that a beam has been broken.

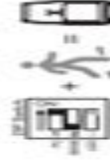

The broader range of all PET units is subject to variation because of different types of coloring, backgrounds, and ambient temperature. For this reason, ensure that the most likely substrate results are well within the PET's tolerance range and that each testing is carried out using these results.
