Reasoning with Law Andrew Halpin, 2001-12-12 The reader is invited to follow a route that visits Fish's view of theory and practice Raz's legal reasoning thesis theoretical models of judicial review Dworkin's right answer thesis the law of the excluded middle and Lukasiewicz's development of three valued logic Wittgenstein's language games and Moore's metaphysical realism The destination is the practice at the heart of legal reasoning It is suggested that this manifests the way in which the limitations of language and the incompleteness of human experience allow the opportunity for coherent development of the law and at the same time produce an inherent incoherence within the law The central part of the book seeks to demonstrate how the problems of understanding legal reasoning replicate difficulties encountered in the philosophy of language but challenges the attempts that have been made to harness approaches from within that discipline to illuminate legal reasoning Instead it is argued that law provides an unrivalled test bed for examining the limits of the capacity of our words and that the study of law may be used to confront in a robust and illuminating manner the limitations of that discipline The final chapter considers some of the implications of recognising the incoherence at the heart of legal reasoning commenting on an institutional approach to law the legitimacy of law legal definitions different approaches to legal reasoning the role of appellate courts the general possibility of providing a theoretical model of law the use of legal rules and the nature of law's critical aperture The book should be of interest to advanced undergraduate students particularly on jurisprudence courses postgraduate students academics and practitioners concerned to reflect on the nature of the discipline they practice

Garland,Lucius Polk McGehee,James Cockcroft,1906 *Constitutional Engagement in a Transnational Era* Vicki Jackson,2013-05-30 Constitutional Engagement in a Transnational Era explores how transnational phenomena affect our understanding of the role of constitutions and of courts in deciding constitutional cases In it Vicki Jackson looks at constitutional court decisions from around the world and identifying postures of resistance convergence or engagement with international and foreign law *Tax Law, Religion, and Justice* Allen Calhoun,2021-03-08 This book asks why tax policy is both attracted to and repelled by the idea of justice Accepting the invitation of economist Henry Simons to acknowledge that tax justice is a theological concept the work explores theological doctrines of taxation to answer the presenting question The overall message of the book is that taxation is an instrument of justice but only when taxes take into account multiple goods in society the requirements of the government the property rights of society s members and the material needs of the poor It is argued that this answer to the presenting question is a theological and ethical answer in that it derives from the insistence of Christian thinkers that tax policy take into account material human need necessitas Without the necessitas component of the tax balance tax systems end up honoring only one of the three components of the tax equation and cease to reflect a coherent idea of justice The book will be of interest to academics and researchers working in the areas of tax law economics theology and history *1918 Cyc.
