Tseng, Geoffrey I. Webb, Bao Ho, Mohadeseh Ganji, Lida Rashidi, 2018-06-18 This three volume set LNAI 10937 10938 and 10939 constitutes the thoroughly refereed proceedings of the 22nd Pacific Asia Conference on Advances in Knowledge Discovery and Data Mining PAKDD 2018 held in Melbourne VIC Australia in June 2018 The 164 full papers were carefully reviewed and selected from 592 submissions The volumes present papers focusing on new ideas original research results and practical development experiences from all KDD related areas including data mining data warehousing machine learning artificial intelligence databases statistics knowledge engineering visualization decision making systems and the emerging applications **Detection of Intrusions and Malware, and Vulnerability Assessment** Daniel Gruss, Federico Maggi, Mathias Fischer, Michele Carminati, 2023-06-09 This book constitutes the proceedings of the 20th International Conference on Detection of Intrusions and Malware and Vulnerability Assessment DIMVA 2023 held in Hamburg Germany in July 2023 The 12 full papers and 1 short paper presented in this volume were carefully reviewed and selected from 43 submissions The papers are organized in thematical sections named Side Channels Attacks Security and Machine Learning Cyber Physical System Security Security Issues when Dealing with Users Analysis of Vulnerable Code Flow Integrity and Security **The Modern Speller** S. Irving Strayer, 1904 **National Magazine ...** , 1898 **Fundamentals of Supervised Machine Learning** Giovanni Cerulli, 2023-11-14 This book presents the fundamental theoretical notions of supervised machine learning along with a wide range of applications using Python R and Stata It provides a balance between theory and applications and fosters an understanding and awareness of the availability of machine learning methods over different software platforms After introducing the machine learning basics the focus turns to a broad spectrum of topics model selection and regularization discriminant analysis nearest neighbors support vector machines tree modeling artificial neural networks deep learning and sentiment analysis Each chapter is self contained and comprises an initial theoretical part where the basics of the methodologies are explained followed by an applicative part

where the methods are applied to real world datasets Numerous examples are included and for ease of reproducibility the Python R and Stata codes used in the text along with the related datasets are available online The intended audience is PhD students researchers and practitioners from various disciplines including economics and other social sciences medicine and epidemiology who have a good understanding of basic statistics and a working knowledge of statistical software and who want to apply machine learning methods in their work

Machine Learning for Indoor Localization and Navigation

Saideep Tiku, Sudeep Pasricha, 2023-06-29 While GPS is the de facto solution for outdoor positioning with a clear sky view there is no prevailing technology for GPS deprived areas including dense city centers urban canyons buildings and other covered structures and subterranean facilities such as underground mines where GPS signals are severely attenuated or totally blocked As an alternative to GPS for the outdoors indoor localization using machine learning is an emerging embedded and Internet of Things IoT application domain that is poised to reinvent the way we navigate in various indoor environments This book discusses advances in the applications of machine learning that enable the localization and navigation of humans robots and vehicles in GPS deficient environments The book explores key challenges in the domain such as mobile device resource limitations device heterogeneity environmental uncertainties wireless signal variations and security vulnerabilities Countering these challenges can improve the accuracy reliability predictability and energy efficiency of indoor localization and navigation The book identifies several novel energy efficient real time and robust indoor localization techniques that utilize emerging deep machine learning and statistical techniques to address the challenges for indoor localization and navigation In particular the book Provides comprehensive coverage of the application of machine learning to the domain of indoor localization Presents techniques to adapt and optimize machine learning models for fast energy efficient indoor localization Covers design and deployment of indoor localization frameworks on mobile IoT and embedded devices in real conditions
