Bookkeeping Basics Lisa M. Venkatrathnam, Debra L Ruegg, 2003-03-15 Bookkeeping Basics No trained bookkeeper on staff No problem Many nonprofits don t have a trained bookkeeper on staff This crucial function goes to whoever has the time and the willingness to do it Lack of accounting training or background is not only frustrating for the individual but also potentially risky for the nonprofit Bookkeeping Basics will enable you to successfully meet the basic bookkeeping requirements of your organization It gives you the knowledge and skills to track the financial activity of your nonprofit in a way that brings order out of chaos safeguards the organization s assets and provides useful information for making sound decisions Clearly defines what you most need to know In plain language the book explains concepts and processes you most need to know including single versus double entry bookkeeping cash versus accrual basis accounting posting financial transactions keeping a paper trail of source documents preparing a trial balance creating financial statements establishing internal controls preparing for your annual audit and closing out your fiscal year Step by step instructions clear definitions of terms and detailed examples help you put concepts into actions Reproducible forms include an accounts payable register accounts receivable register accounts receivable register general ledger financial summary form grant tracking form internal controls activity flow chart and an audit preparation checklist Bottom line If you re the bookkeeper for your nonprofit by choice or default this book is for you

Self-Service Data Analytics and Governance for Managers Nathan E. Myers, Gregory Kogan, 2021-06-02 Project governance investment governance and risk governance precepts are woven together in Self Service Data Analytics and Governance equipping managers to structure the inevitable chaos that can result as end users take matters into their own hands Motivated by the promise of control and efficiency benefits the widespread adoption of data analytics tools has created a new fast moving environment of digital transformation in the finance accounting and operations world where entire functions spend their days processing in spreadsheets With the decentralization of application development as users perform their own analysis on data sets and automate spreadsheet processing without the involvement of IT governance must be revisited to maintain process control in

the new environment In this book emergent technologies that have given rise to data analytics and which form the evolving backdrop for digital transformation are introduced and explained and prominent data analytics tools and capabilities will be demonstrated based on real world scenarios The authors will provide a much needed process discovery methodology describing how to survey the processing landscape to identify opportunities to deploy these capabilities Perhaps most importantly the authors will digest the mature existing data governance IT governance and model governance frameworks but demonstrate that they do not comprehensively cover the full suite of data analytics builds leaving a considerable governance gap This book is meant to fill the gap and provide the reader with a fit for purpose and actionable governance framework to protect the value created by analytics deployment at scale Project governance investment governance and risk governance precepts will be woven together to equip managers to structure the inevitable chaos that can result as end users take matters into their own hands
