Walashek, 2011-03-28 In provocative terms that push the envelope of technical administrative and legal capabilities Swanson and Walashek propose a re vamped US census based neither on the current system self enumeration nor its predecessor door to door canvassing Instead they propose that it be built on a combination of four elements 1 administrative records 2 the continuously updated Master Address File 3 survey data and 4 modeling and imputation techniques They use Census Enhanced Master Address File CEMAF as a descriptive term for their proposal which is based on four principles and includes a proposal for an independent Census Bureau They argue that evidence suggests that the methods used to conduct traditional census counts may be at the end of their useful working lives as evidenced by increasing costs and declining response rates Some of their ideas will seem farfetched However Swanson and Walashek believe this is the time to discuss radical proposals as governments re examine the utility of traditional census counts and consider reductions as is the case in Canada and England This SpringerBriefs should be on the reading list of staff in statistical agencies grappling with rising costs and declining response rates as well as census stakeholders concerned about costs accuracy and census utility **Resources in Education** ,2001-04 *A Manual for the Chemical Analysis of Metals* ,
