Government Reports
Announcements & Index, 1982 *Latina/o American Health and Mental Health* Leticia Arellano-Morales Ph.D., Erica T. Sosa, 2018-02-16 Essential reading for health and mental health administrators community agencies and policy makers as well as students and general interest readers this book details the state of the physical and mental health of many Latina o American groups While Latina o Americans originate from more than 25 countries most health or mental health texts largely focus on Mexican Americans and often fail to address other Latina o groups such as South Americans Central Americans Puerto Ricans and others Moreover most works address either health or mental health but not both together In contrast

Latino American Health and Mental Health addresses both the health and mental health of diverse Latino heritage groups. An interdisciplinary approach enables readers to identify both similar and divergent areas that affect the health and mental health of Latino Americans. Strengths based and social justice perspectives rather than a deficit perspective guide the work in its assessment of disparities among treatment for different groups. This text is ideal for graduate students, practitioners, researchers, and policy makers in public health, community health, family studies, psychology, counseling, social work, and Latino studies who are interested in understanding Latino health and mental health in the United States and providing culturally responsive services.

Clinical Chemistry - E-Book Donna Larson, 2015-12-17 Gain a clear understanding of pathophysiology and lab testing. Clinical Chemistry Fundamentals and Laboratory Techniques prepares you for success as a medical lab technician by simplifying complex chemistry concepts and lab essentials including immunoassays, molecular diagnostics, and quality control. A pathophysiologic approach covers diseases that are commonly diagnosed through chemical tests broken down by body system and category such as respiratory, gastrointestinal, and cardiovascular conditions. Written by clinical chemistry educator Donna Larson and a team of expert contributors, this full color book is ideal for readers who may have minimal knowledge of chemistry and are learning laboratory science for the first time. Full color illustrations and design simplify complex concepts and make learning easier by highlighting important material. Case studies help you apply information to real life scenarios. Pathophysiology and Analytes section includes information related to diseases or conditions such as a biochemistry review, disease mechanisms, clinical correlation, and laboratory analytes and assays. Evolve companion website includes case studies and animations that reinforce what you've learned from the book. Laboratory Principles section covers safety, quality assurance, and other fundamentals of laboratory techniques. Review questions at the end of each chapter are tied to the learning objectives, helping you review and retain the material. Critical thinking questions and discussion questions help you think about and apply key points and concepts. Other Aspects of Clinical Chemistry section covers therapeutic drug monitoring, toxicology, transplantation, and emergency preparedness. Learning objectives in each chapter help you to remember key points or to analyze and synthesize concepts in clinical chemistry. A list of key words is provided at the beginning of each chapter and these are also bolded in the text. Chapter summaries consist of bulleted lists and tables highlighting the most important points of each chapter. A glossary at the back of the book provides a quick reference to definitions of all clinical chemistry terms.
