operated in closest possible contact with working scientists in the field These centers not only furnish information about ongoing research and disseminate and retrieve information but also create new information and develop new methods of information analysis synthesis and dissemination The continually expanding biomedical literature produced by scientists from the world's laboratories research centers and medical centers led the National Institute of Neurological Diseases and Stroke in 1964 to initiate a National Neurological Information Network of specialized centers for neurological information The Centers are designed to bring under control and to promote ready access to important segments of the literature
