is the first time an accomplished practitioner has usefully codified the complex emotional processes of consumer brand choice. At the very least, Imran Syed has constructed the first practical algorithm for 21st century brand management. Over time, *Wowability* will prove to be a landmark work, and Imran, the Maslow of our era, Andy Berlin, Chairman and CEO, Group United, in a marketplace filled with a stultifying array of brands, it is absolutely imperative that marketers exceed the expectations of their customers; in other words, WOW them. Imran Syed has created the user's manual for driving the modern day brand. Every person responsible for driving the success of a brand today should keep a copy of *Wowability: How to Achieve It, Why It Matters* in the proverbial glove compartment. David Verklein, CEO, Carat Americas, Chairman, Carat Asia Pacific. The modern customer wants value for money. In this book, Imran Syed has provided a blueprint for how brands can offer value that exceeds expectations. *Wowability*. I strongly recommend this book to anyone who would like to take a mediocre brand into the high performance zone. WOW. Dr. H. National Convention of the American Legion*, American Legion, National Convention, 2005. **Public Administration in East Asia**, Evan M. Berman, 2017-09-25. Written by leading experts, *Public Administration in East Asia: Mainland China, Japan, South Korea, Taiwan* examines the inner workings of governments in East Asia, in particular its public administration and related public policy processes. It focuses on the apparatus of government, the agencies, their values, context, and policies within which they operate. Organized in parallel sections, the book covers the history, public policy processes, organization, HRM, ethics, corruption, intergovernmental relations, performance management, and e-government. It discusses each of these topics separately for Mainland China, Japan, South Korea, and Taiwan, providing an unusual and important comparative perspective. The book includes essential knowledge and facts, discussions of emerging issues, and useful resources for further reading. It addresses questions such as: What is the history of public administration in East Asia? How are decisions made? What is the role of Confucianism in shaping public administration? How does the developmental path affect public administration? Why is performance management emphasized? What is the state of citizen participation? How are ethical underpinnings of the civil service different from the West? Why are intergovernmental relations an essential issue in East Asia? What are the politics behind world-class achievements in IT? What is the nature of civil service reform? What is the nature of efforts to combat government corruption? You can find many books on trade policy and politics that sometimes give good insight into the operation of government agencies. You can also find a few edited books that contain single chapters on countries in the Asia Pacific region. What is missing, however, is a single resource that provides an overview with depth on matters solely about public administration. This state-of-the-art resource brings together the fragments of existing knowledge on East Asian economies, filling the need for a comprehensive compendium that showcases the public administration practices in the region and East Asia's innovative approaches to governance and its many challenges.
