

## 7.10.5 Restoring data

### Description

 **WARNING** Only KSS 8.3 archives may be loaded into KSS 8.3. If other archives are loaded, the following may occur:

- Error messages
- Robot controller is not operable.
- Personal injury and damage to property.

The following menu items are available for restoring data:

- **All**
- **Applications**
- **System data**

If the archived files are not the same version as the files present in the system, an error message is generated during restoration.

Similarly, if the version of the archived technology packages does not match the installed version, an error message is generated.

### Pre-condition

- If data are to be restored from the USB stick: A USB stick with the archive is connected.

The stick can be connected to the smartPAD or robot controller.

 **NOTICE** A non-bootable USB stick must be used. We recommend using a non-bootable KUKA stick. Data may be lost if a stick from a different manufacturer is used.

### Procedure

1. In the main menu, select **File > Restore** and then the desired subitems.
2. Confirm the request for confirmation with **Yes**. Archived files are restored to the robot controller. A message indicates completion of the restoration process.
3. If data have been restored from a USB stick: the stick can now be removed.
4. Reboot the robot controller.

## 7.11 Project management

### 7.11.1 Pinning a project on the robot controller

#### Description

Projects that are present on the robot controller can be pinned. A project can be pinned directly on the robot controller or in WorkVisual.

Pinned projects cannot be changed, activated or deleted. They can be copied or unpinned, however. A project can thus be pinned e.g. to prevent it from being accidentally deleted.

 Information about how projects can be pinned via WorkVisual can be found in the **WorkVisual** documentation.

#### Pre-condition

- "Expert" user group

#### Procedure

1. Touch the WorkVisual icon on the smartHMI, then go to **Open**. The **Project management** window opens.
2. Select the desired project and press the **Pin** button. The project is pinned and labeled with a pin symbol in the project list.
