what is supply chain network design and how does it work - Sep 04 2022

web supply chain network design is the process of building and modeling a supply chain to better understand the costs and time associated with bringing goods to market with the resources and locations available

a multi objective optimization model for designing resilient supply - Nov 06 2022

web oct 1 2018 in this paper we present a multi objective optimization based network design methodology to help supply chain architects improve the effectiveness of their supply chain networks our methodology effectively evaluates the trade off between two conflicting objective functions of interest minimizing total supply chain costs and maximizing
