

Polaris® EOS® Wireless Antenna and Remote Installation Instructions

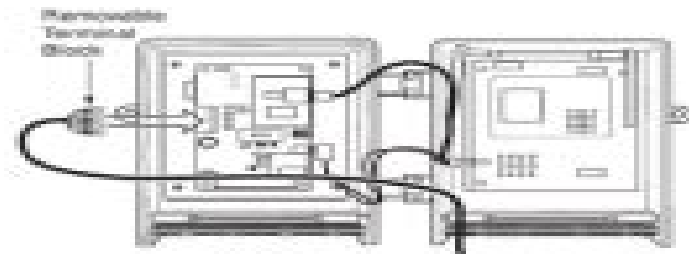

Installation

Wireless Antenna

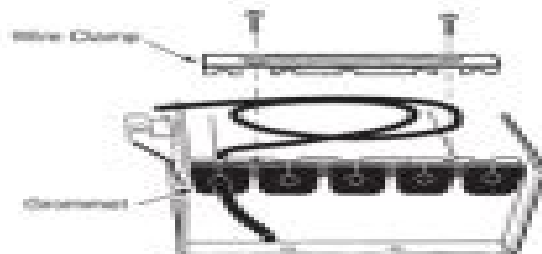

Mount the antenna in a high location, in line-of-sight with the wireless remote and in the center of the coverage area. Avoid areas where the radio signal must pass through fencing, stucco walls, reinforced block walls, etc.

1. Open the antenna door and connect cable wires to the removable terminal block using this color-coded sequence:

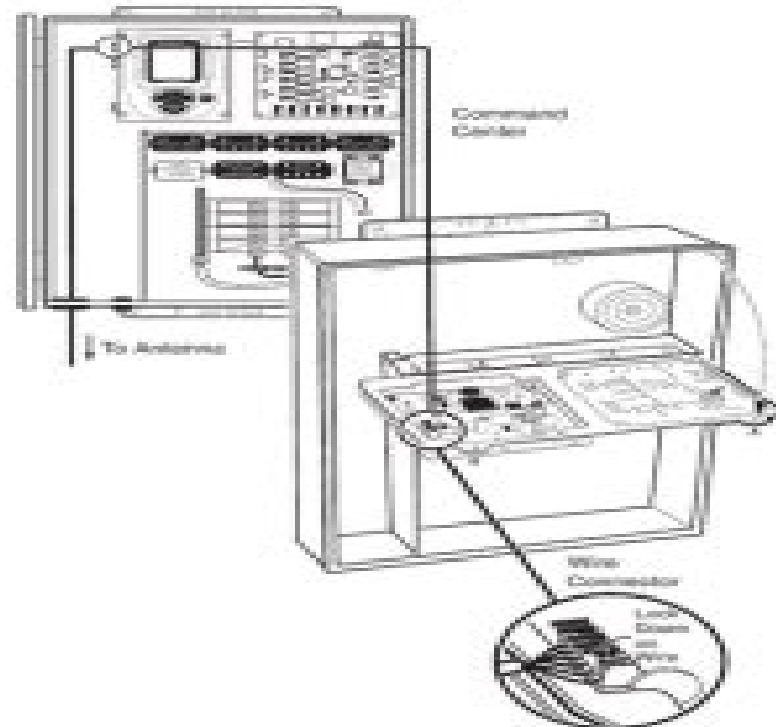

Pin #	Wire Color
1	Green
2	Yellow
3	Orange
4	Red
5	Blue + Brown
6	Black + Purple

2. Remove the wire clamp and feed the wire into the left-most position, leaving about 12" of extra cable in the box. Push the wire into the rubber grommet seal. Reinstall the clamp and close the box.

3. Route the antenna cable to the EOS Command Center and in through the low voltage compartment.
4. Unscrew and swing down the hinged board plate to access the circuit boards.
5. Connect the antenna wire to the removable terminal on the command center board using the same pin/color sequence. To connect multiple remotes with the antenna, install a RBC Hub Card (part #E36).

For installations with multiple antennas, the wires can terminate at the Command Center or be wired to the terminal block of another antenna or wired remote (max. 2000 ft.).

After all connections are complete, power-up the EOS Command Center to verify that communication has been established.
