**A Practical Guide to Teaching Research Methods in Education** Aimee LaPointe Terosky, Vicki L. Baker, Jeffrey C. Sun, 2023-03-23 A Practical Guide to Teaching Research Methods in Education brings together more than 60 faculty experts. The contributors share detailed lesson plans about selected research concepts or skills in education and related disciplines as well as discussions of the intellectual preparation needed to effectively teach the lesson. Grounded in the wisdom of practice from exemplary and award-winning faculty from diverse institution types, career stages, and demographic backgrounds, this book draws on both the practical and cognitive elements of teaching educational and related research to students in higher education today. The book is divided into eight sections covering the following key elements within education and related research: problems and research questions, literature reviews and theoretical frameworks, research design, quantitative methods, qualitative methods, mixed methods, findings and discussions, and special topics such as student identity, development, community, and policy. Engaged research and research dissemination. Within each section, individual chapters specifically focus on skills and perspectives needed to navigate the complexities of educational research. The concluding chapter reflects on how teachers of research also need to be learners of research as faculty continuously strive for mastery, identity, and creativity in how they guide our next generation of knowledge producers through the research process. Undergraduate and graduate professors of education and related research, courses, dissertation chairs, committee members, faculty development staff members, and graduate students would all benefit from the lessons and expert commentary contained in this book.

*A Teacher's Guide to VITAL Collaboration* Kevin Perks, 2025 This guide provides K-12 educators with a structured, evidence-driven approach to Professional Learning Communities (PLCs) offering powerful tools and facilitation techniques to enhance both teaching and professional growth. Unlike typical approaches to data teams, the VITAL (Visibly Improving Teaching and Learning) Collaboration model uses concrete evidence from teacher practice and student learning to establish clear goals and pathways for equitable instructional improvement. It facilitates visible growth in both teachers and students by examining artifacts such as lessons, classroom observations, student work, and assessment data. The comprehensive framework integrates insights from research on teacher efficacy, improvement science, professional learning communities, and lesson study to optimize collaborative efforts. Teachers and school leaders will find practical strategies, protocols, and facilitation guidance to foster a culture of continuous improvement within their PLCs. Whether you are enhancing your instructional practices or guiding colleagues toward better outcomes, this guide will help you maximize the impact of every PLC session. This book is an excellent companion to Kevin Perks's *A School Leader's Guide to VITAL Collaboration*. Beddow, Alexander Kurz, 2018-03-08 The Second Edition of this handbook provides comprehensive coverage of the concept of accessibility and its application to the design and implementation of instruction and tests with all students. It updates and expands on its original contents and responds to the increasing demand for research-based evidence of accessible instruction and testing practices from the professional community. In addition, the handbook describes how the Center for Applied Special Technology (CAST) has continued to advance Universal Design for Learning (UDL) principles in mainstream education with teachers of all types of students, not just students with disabilities. Topics featured in this text include: A summary of U.S. policies that support inclusive assessment for students with disabilities; An overview of international policies that support inclusive assessments; Designing, developing, and implementing an accessible computer-based national assessment system; Universal Design for Learning (UDL) principles and the future of assessment; Recent advancements in the accessibility of digitally delivered educational assessments.
