Arts Development in Community Health Mike White, 2009 Arts in community health is a distinct area of activity that is characterised by the use of participatory arts to promote health Based on the latest international research this book considers how and why arts in community health has come about the characteristics of its practice and the challenges it poses for evaluation The rapid growth of this field of work in the UK from the mid 1990s has begun to impact on policy in the arts funding system on multi sector partnerships for health service delivery and in local authority cultural strategies yet the reasons for its emergence and the nature and diversity of the practice itself have gone largely unaccounted for It encompasses work in primary care community health and public health Arts in community health has not evolved simply as a result of the successful advocacy of an arts sector keen to demonstrate its relevance to health but rather through the wider recognition of a phenomenological connection between engagement in cultural activity and well being The pioneering viewpoints in this book promote an holistic approach to arts and public health focusing on the development of the person and not just the sick or dysfunctional part of that person Alongside the therapeutic benefits to patients the book also considers environmental improvements to support staff and using the arts to produce more creative kinds of health information This fully referenced guide compares and contrasts the arts in different cultures and healthcare systems how well it works why it works and the factors that determine its success The case studies examined prove shared creativity aids public health and simultaneously identifies and addresses the local and specific health needs in a community In the last decade health has become a recurrent topic in discussion of the role of the arts in society fuelled by a growing body of research into connections between culture and well being This pioneering practice of arts in community health began in the UK in the late 1980s through sporadic pilot projects placing local arts development in health promotion and primary care contexts It has since grown and expanded to embrace community health on a broad front hooking up with multi agency initiatives to address the social determinants of health through partnership working Mike White in the Introduction

Design Economics for the Built Environment Herbert Robinson, Barry Symonds, Barry Gilbertson, Ben Ilozor, 2015-06-15 The drive towards environmentally friendly buildings and infrastructure has led to a growing interest in providing design solutions underpinned by the core principles of sustainability to balance economic, social and environmental factors. *Design Economics for the Built Environment: Impact of sustainability on project evaluation* presents new directions reflecting the need to recognise the impact of climate change and the importance of sustainability in project evaluation. The aim is to provide a new approach to understanding design economics in the context of the changing policy environment, legislative and regulatory framework and increasing economic, environmental and social pressure as a result of the sustainability agenda. The book follows a structured approach from theories and principles in the earlier chapters to the practical applications and emerging techniques focusing on value and social, economic and environmental considerations in making design decisions. It starts with the policy context, building on various theories and principles such as capital cost, value of design and resource-based theories, the new rules of measurement, NRM to explore cost planning, the relationship between height and costs, key socio-economic and environmental variables for design appraisal, eco-cost, value ratio, EVR, whole life theory and the treatment of carbon emission as external costs, productivity and efficiency, fiscal drivers and legal framework for carbon reduction, procurement and allocation of risks in contracts. Case studies, practical examples and frameworks throughout reinforce theories and principles and relate them to current practice. The book is essential reading for postgraduate students in architecture, building and quantity surveying and is also a valuable resource for academics, consultants and policy makers in the built environment.

Bids, Tenders and Proposals Harold Lewis, 2015-10-03 *Bids, Tenders and Proposals* is a practical guide to winning contracts and funding through competitive bids, proposals and tenders. Written in a clear, accessible style using examples and checklists from real-life winning bids and tenders, this book explains how to create bids that are outstanding in both technical quality and value for money. This fully updated fifth edition extends the scope and content of the book, making it suitable for established contractors as well as anyone who needs to put together a bid for business or funding. This timely new edition covers the 2015 EU regulations for proposals, bids and tenders, including the latest regulatory changes to ensure that the reader has the most current guidelines. It also includes new content on bidding for contract opportunities in international markets and information resources to support bids. *Bids, Tenders and Proposals* provides fully up-to-date best practice and is essential reading for anyone involved in tendering for new business. Online supporting resources for this book include checklists and sample templates for preparing a successful bid.
