Impact of Implementing Intelligence Community Information Technology Enterprise (IC ITE) within the Intelligence Community

Chapter I: INTRODUCTION:

The purpose of this paper is to explore how the Director of National Intelligence (DNI) can improve intelligence information sharing and integration. The Intelligence Community Information Technology Enterprise (IC ITE) is one way the DNI could improve intelligence information sharing and integration. Through the development and deployment of IC ITE services, the DNI has potential to provide to the Intelligence Community (IC) an automated, collaborative, secure, and dynamic environment with the necessary tools for IC integration and collaboration not previously experienced. The IC ITE operates under a blueprint of the National Intelligence Strategy (NIS) shaping priorities for IC agencies[1]. IC ITE services will be used by analysts, mission support users, and consumers of intelligence products. The majority of users have little or no knowledge of how IC ITE will impact mission, daily operations, funding, human resources, contracts, and acquisition practices. Some traditional methods currently used within the IC to assist analysis will change such as data access, programs, applications, and use of technology in the completion of daily activities.

This change will require new policies, agreements, and improvements in how users' access disseminates, and store data. In addition to those above, a culture shift and change in mindset are essential for full integration and collaboration. The full implementation of IC ITE will improve analysis for IC members, and consumers of information

Technology (IT) services. The IC IT Enterprise is the DNI's transformative workforce which is involved in crafting, projecting and orienting the vision based on the existing intelligence model. IC ITE moves seventeen disperse IC agencies into a single-centric IT architecture working on a common platform where the community quickly and securely shares technology, information, and resources[2]. By managing and providing the community's IT infrastructure and services as a single enterprise, the IC will not only be more efficient but will also establish a robust platform to deliver more innovative and secure technology to desktops at all levels across the intelligence enterprise. The result is seamless sharing and integration process is more of a procedure of improving collaboration between various intelligence departments[3]

The former Director shared his vision by moving most security organizations to to an entirely digital enterprise. The DNI wants to deliver all- intelligence analysis products anywhere and at any time in a digital format. IC ITE is essential in providing this capability in facilitating IC integration and collaboration.

Handbook of Research on Advancing Equity and Inclusion Through Educational Technology Escudeiro, Paula, Escudeiro, Nuno, Bernardes, Oscar, 2023-08-09 Digital technologies play a significant role in the popular imagination about the future of education as they are a prominent aspect of modern education provision and practice across the globe. Due to the increased adoption of digital education materials during the COVID 19 pandemic the pedagogical significance of digital technology has been amplified. *Advancing Equity and Inclusion Through Educational Technology* builds upon the available literature in equity and inclusion through educational technology while providing further research opportunities in this dynamic and growing field. It provides the opportunity for reflection on this crucial issue by increasing the understanding of the importance of inclusion and equity in the context of educational improvements and providing relevant academic work, empirical research findings and an overview of this relevant field of study. Covering topics such as sustainable inclusion, learning, virtual school, press programs and generic skills, this major reference work is a comprehensive and timely resource for educators and administrators of both K 12 and higher education, government officials, pre-service teachers, teacher educators, librarians, researchers and academicians. Selected Essays on Science and Technology for Securing a Better Philippines Gisela P. Padilla, Concepcion, Eduardo A. Padlan, Caesar A. Saloma, 2008. *Research and Advanced Technology for Digital Libraries* Traugott Koch, Ingeborg T. Solvberg, 2004-02-26. Welcome to ECDL 2003 and to these conference proceedings featuring all the papers presented at the 7th European Conference on Research and Advanced Technology for Digital Libraries. Following Pisa 1997, Heraklion 1998, Paris 1999, Lisbon 2000, Da stad 2001 and Rome 2002, ECDL 2003 in Trondheim reaches some of the northernmost shores of the continent. Being the seventh in an annual series of conferences represents for better and for worse a considerable tradition in the fast changing world of digital library related research and development. It is still a difficult and slow job to change traditional forms and formats of communication at and related to scientific conferences and also to change participants' expectations. Yet each new conference builds upon the topics and communities involved in previous events and inherits the commitment to quality established by its predecessors. Each year ECDL has to live up to its role of being the major European forum focusing on digital libraries and associated technical, practical and social issues, bringing diverse disciplines and application communities together. There are still challenges in this respect ahead of us, but the quality and range of papers and other contributions combined with opportunities for debate should ensure that ECDL 2003 sets high standards for the future.
