The North American Auto Industry since NAFTA Greig Mordue, Dimitry Anastakis, 2024-10-01. The auto sector is North America's most iconic of industries. Since the North American Free Trade Agreement came into existence in 1994, the sector has undergone tremendous change, escalating concerns around climate change, advances in electric and automated vehicles, deindustrialization, reindustrialization and the rise of low cost locations as hubs for manufacturing. The North American Auto Industry since NAFTA examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in North America. The collection addresses the punctuations that have afflicted the industry since NAFTA's implementation as well as the slower incremental evolutions that have also occurred. Several aspects of automobility and the industry are explored, including but not limited to the Canadian, American and Mexican automotive sectors and their evolution and interaction under evolving trade regimes. The book analyses issues surrounding labour, technology, trade policy, regional development, the environment and broader societal impacts of the automobile. It also draws on the expertise of a wide cross section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in North America's economic, business and political landscape.

Make America Great Again: Myths, Lies, and Facts Leon Robertson, 2019-05-26. Who invented fraudulent financial real estate loan schemes that almost destroyed the world financial system? Who closed their factories in U.S. communities and opened them in other countries? Who kept their U.S. workers' pay stagnant while their income soared? Who wants to sell all the coal and oil that they own no matter how hot the earth gets? Who flooded U.S. cities and towns with opioid prescription drugs? Not foreign governments and not illegal immigrants. The answer is rich American capitalists. Without rules, many capitalists will attempt to monopolize markets. They will also dump their wastes into the environment and use their economic power to try to control governments. Trump and his henchmen are changing the rules to benefit the rich, not Make America Great Again. U.S. history can guide us how to truly make America better, but Americans must learn what works and what does not and vote accordingly.

THE REPORT Algeria 2018 Oliver Cornock. Algeria is one of the main African producers of hydrocarbons, ranking first in gas production and among the top three oil producers. The country remains highly dependent on the hydrocarbons sector for the majority of government revenues and almost the entirety of its exports. Despite reforms to encourage private sector development, promote diversification and attract foreign direct investment in recent

years the state still plays a preponderant role meaning that changes to government expenditure and investments continue to have a significant impact on overall economic performance
