Ann Sawyer, 2020-03-13 This book originally published in 1993 addresses the issues surrounding the teaching of mathematics in primary school at the time. The author considers the issues that had arisen through the introduction of the National Curriculum both in terms of the current state of the art and new developments **Understanding Teacher Education**
James Calderhead, Susan B. Shorrock, 2003-09-02 This text reports a study of 20 student primary teachers, 10 on a conventional PGCE course and 10 on a school-based articulated teacher training course, documenting their learning experiences over a two-year period. The authors explore the factors that facilitate or impede the students' learning as teachers. In drawing upon these case studies together with existing theoretical models of professional development, the authors distinguish several key characteristics of learning to teach and discuss the implications of these for the design of effective school-based teacher education courses *Supporting Maths and English in Post-14 Education and Training* Jo-Ann Delaney, Amanda Cope, 2016-07-16 This book offers a practical solution to the challenges trainee teachers and practising teachers face when asked to address English and maths across the further education curriculum. Aimed firmly at non-specialist teachers of English and maths, each chapter has activities to raise your own awareness of English or maths concepts as well as examples of activities that you can use in your teaching to ensure English and maths are appropriately embedded.
