

Industrial Revolution Essentials

WHILS The student will demonstrate knowledge of the effects of the Industrial Revolution during the nineteenth century by:

- citing scientific, technological, and industrial developments and explaining how they brought about urbanization and social and environmental changes;
- explaining the emergence of capitalism as a dominant economic pattern, and the subsequent development of socialism and communism;
- describing the evolution of the nature of work and the labor force, including its effects on families, the status of women and children, the slave trade, and the labor union movement;

- The Industrial Revolution began in England due to natural resources (coal, iron, steam engine) and soon spread to Europe and USA. It all started in the textile industry.
- British enclosure movement fenced in land into individual plots pushing farmers off their land.
- People moved to the city to find jobs, working in factories where work was monotonous, dangerous and long.
- Factories replaced the cottage industry (where people made good in their homes).

- Work in the factories was hard and dangerous. Workers had long hours and little pay.
- Labor Unions were organized by workers:
 - They encouraged strikes to increase wages & improve working conditions.
 - They lobbied for laws to improve lives of workers (men/women/kids)
 - Used Collective bargaining: negotiation between worker & manager/owner.

Results of the Industrial Revolution

- Population increase
- Urbanization (increase of cities)
- Growth of middle class
- Increase in education
- Improved transportation
- Increase in standards of living for many
- Environmental pollution
- Dissatisfaction with working conditions
