

SECTION 16-3

THE PROCESS OF SPECIATION

- Reproductive isolation can take several forms:
 1. *Behavioral isolation* --- the species are capable of interbreeding, but do not respond to each other's overtures (different mating rituals or reproductive strategies).
 2. *Geographic isolation* --- may or may not lead to separate species; natural selection does work separately on each group.
 3. *Temporal isolation* --- different mating times (EX: pollen production)
