Koot,2017-12-26 Reveals the little known history of one of history s most famous maps and its maker Tucked away in a near forgotten collection Virginia and Maryland as it is Planted and Inhabited is one of the most extraordinary maps of colonial British America Created by a colonial merchant planter and diplomat named Augustine Herrman the map pictures the Mid Atlantic in breathtaking detail capturing its waterways coastlines and communities Herrman spent three decades travelling between Dutch New Amsterdam and the English Chesapeake before eventually settling in Maryland and making this map Although the map has been reproduced widely the history of how it became one of the most famous images of the Chesapeake has never been told A Biography of a Map in Motion uncovers the intertwined stories of the map and its maker offering new insights into the creation of empire in North America The book follows the map from the waterways of the Chesapeake to the workshops of London where it was turned into a print and sold Transported into coffee houses private rooms and government offices Virginia and Maryland became an apparatus of empire that allowed English elites to imaginatively possess and accurately manage their Atlantic colonies Investigating this map offers the rare opportunity to recapture the complementary and occasionally conflicting forces that created the British Empire From the colonial and the

metropolitan to the economic and the political to the local and the Atlantic this is a fascinating exploration of the many meanings of a map and how what some saw as establishing a sense of local place could translate to forging an empire
