The book presents the research findings of scientists working at universities in the Far Eastern Siberian and Ural Federal Districts of Russia and of Serbia which are unique regions notable for sustainably operating complex transport infrastructures in severe climatic and geographic environments. It also offers practical insights into transportation operation under such conditions. The book discusses the experiences of colleagues from Slovenia, Ukraine and Latvia in the development of transport infrastructure and construction of transport facilities and features and includes the results of a wide range of studies such as managing multimodal transportation, improving the efficiency of locomotives, electric locomotives, traction substations, electrical substations, relay protection and automation devices and power factor correction units. It addresses topics like renewable energy sources, problems of the mathematical and simulation modelling of electromagnetic processes of electrical power objects and systems, aspects of cost reduction for fuel and power resources, theoretical aspects of energy management, development of transport infrastructure, modern organizational and technological solutions in construction, new approaches in the field of management analysis and monitoring in transport sector. Comprising 142 high quality articles covering a wide range of topics, these proceedings are of interest to anyone engaged in transport engineering, electric power systems, energy management, construction and operation of transport infrastructure, buildings and facilities. *Monthly Catalog of United States Government Publications*, 1978

**Geotechnical Aspects of Underground Construction in Soft Ground**  
 Mohammed Elshafie, Giulia Viggiani, Robert Mair, 2021-05-10 Geotechnical Aspects of Underground Construction in Soft Ground comprises a collection of 112 papers: the Fujita Lecture, three Special Lectures and the Bright Spark Lecture presented at the Tenth International Symposium on Geotechnical Aspects of Underground Construction in Soft Ground held in Cambridge, United Kingdom, 27-29 June 2022. This second edition includes four general reports on the symposium themes. The symposium is the latest in a series which began in New Delhi in 1994 and was followed by symposia in London 1996, Tokyo 1999, Toulouse 2002, Amsterdam 2005, Shanghai 2008, Rome 2011, Seoul 2014 and Sao Paulo 2017. This was organised by the Geotechnical Research Group at the University of Cambridge under the auspices of the Technical Committee TC204 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). Geotechnical Aspects of Underground Construction in Soft Ground includes contributions from more than 25 countries on research, design and construction of underground works in soft ground. The contributions cover field case studies, sensing technologies and monitoring for underground construction in soft ground, physical and numerical modelling of tunnels and deep excavations in soft ground.

Seismic response of underground infrastructure in soft ground Design and application of ground improvement for underground construction Ground movements interaction with existing structures and mitigation measures The general reports give an overview of the papers submitted to the symposium covered in four technical sessions The proceedings include the written version of the five invited lectures covering topics ranging from developments in geotechnical aspects of underground construction tunnelling and groundwater interaction short and long term effects the influence of earth pressure balance shield tunnelling on pre convergence and segmental liner loading field observations modelling and implications on design Similar to previous editions Geotechnical Aspects of Underground Construction in Soft Ground represents a valuable source of reference on the current practice of analysis design and construction of tunnels and deep excavations in soft ground The book is particularly aimed at academics and professionals interested in geotechnical and underground engineering
