

What do you think about it? Please read the case carefully and answer the questions below in your notebook.

1. Identifying the sources (title and authors)

Title: New Widespread Use of Drugs
Author: Robert L. Leshing

2. Finding the geographical area investigated, Population, year of research

Geographical area: Indiana
Investigation year: 1980-1981

3. Categorizing and describing the variables, population or sample, whether it is random, how the sample was selected and methods

Variables: usage, dynamics, trends, attitudes
Sample: random, yearly, several, all hospitals
How the sample was selected: dynamics, files, random

4. Identifying and classifying variables as continuous or categorical

Age and sex: Categorical (but is divided into ranges called broad classes). For example, illness, education is binary "yes" or "no" and marital status, sex and education level is ordered range. The authors reported several variables that affect the results and the frequency of illness was not at the top. In fact, the authors said that frequency and that education contributed with frequency equally, as a related variable in the study and they provided clinical signs with frequency. Education showed that by controlling it, the family environment enhanced the potential frequency of illness for parents, but the frequency of illness was not high that education showed that more of the frequency.
