Pro Oracle Database 23ai Administration Michelle Malcher,Darl Kuhn,2024-12-26 Master Oracle Database administration in both on premises and cloud environments This new edition covers the tasks you ll need to perform to keep your databases tuned and performing and includes new important innovations with AI Vector Search JSON Duality Views and Select AI Since Oracle Database 23ai offers a choice of platforms with on premises and cloud the book also includes administrative tasks specific to cloud environments including the Oracle Autonomous Database running in the Oracle Cloud Infrastructure New in this edition is help for DBAs who are becoming involved in data management and a look at the idea of a converged database and what that means in handling various data types and workloads The book covers some of the machine learning features now in

Oracle and shows how the same SQL that you know for database administration also helps you with data management tasks. The information in this book helps you to apply the right solution at the right time, mitigating risk and making robust choices that protect your data and avoid midnight phone calls. Data management is increasingly a DBA function, and DBAs are often called upon for help in getting data loaded into analytics environments such as a data lakehouse or a data mesh. This book addresses this fast-growing new role for database administrators and helps you build on your existing knowledge to make the transition into a new skill set that is in high demand. You'll learn how to look at data optimization from the standpoint of data analysis and machine learning so that you can be seen as a key player in preparing your organization's data for those types of activities. You'll know how to pull back information from a combination of relational tables and JSON structures. You'll become familiar with the tools that Oracle Database provides to make analytics easier and more straightforward. And you'll learn simpler ways to manage time-based tables that eliminate the need for painfully creating triggers to track the history of row changes over time. This book builds your skills as an Oracle Database administrator with the aim of helping you to be seen as a key player in data management as your organization pivots toward cloud computing and a greater use of machine learning and analytics technologies.

What You Will Learn

- Configure and manage Oracle 23ai databases both on premises and in the cloud.
- Meet your DBA responsibilities in the Oracle Cloud and with Database Cloud Services.
- Leverage converged database capabilities to manage different workloads, structured and unstructured data.
- Perform administrative tasks for Autonomous Database dedicated environments.
- Perform DBA tasks and effectively use data management tools.
- Migrate from on premises to the Oracle Cloud Infrastructure.
- Troubleshoot issues with Oracle 23ai databases and quickly solve performance problems.
- Architect cloud on premises hybrid and multi cloud database environments.

Who This Book Is For

Oracle database administrators, DBAs who want to be current with the new features in Oracle Database 23ai. For any DBA who is tasked with managing Oracle databases in cloud, hybrid cloud, and multi cloud configurations. Also helpful for data architects who are designing analytic solutions in data lake house and data mesh environments.

Penetration testing a network requires a delicate balance of art and science. A penetration tester must be creative enough to think outside of the box to determine the best attack vector into his own network and also be expert in using the literally hundreds of tools required to execute the plan. This second volume adds over 300 new pentesting applications included with BackTrack 2 to the pen tester's toolkit. It includes the latest information on Snort, Nessus, Wireshark, Metasploit, Kismet, and all of the other major Open Source platforms. Perform Network Reconnaissance: Master the objectives, methodology, and tools of the least understood aspect of a penetration test. Demystify Enumeration and Scanning: Identify the purpose and type of the target systems, obtain specific information about the versions of the services that are running on the systems, and list the targets and services. Hack Database Services: Understand and identify common database service vulnerabilities, discover database services, attack database authentication mechanisms, analyze the contents of the database, and use the database to obtain access to the host operating system. Test Web Servers and Applications: Compromise the Web server due to vulnerabilities on the server daemon itself, its unhardened state, or vulnerabilities within the Web applications. Test Wireless Networks and Devices: Understand WLAN vulnerabilities, attack WLAN encryption, master information gathering tools, and deploy exploitation tools. Examine Vulnerabilities on Network Routers and Switches: Use Traceroute, Nmap, ike scan, Cisco Torch, Finger, Nessus, onesixtyone, Hydra, Ettercap, and more to attack your network devices. Customize BackTrack 2: Torque BackTrack 2 for your specialized needs through module management, unique hard drive installations, and USB installations. Perform Forensic Discovery and Analysis with BackTrack 2: Use BackTrack in the field for forensic analysis, image acquisition, and file carving. Build Your Own PenTesting Lab: Everything you need to build your own fully functional attack lab.
