Solved Papers Practice Sets 1 20 General Financial Awareness Practice Sets 1 20 Enhancing Mobility in Later Life

Heidrun Mollenkopf,2005 Outdoor mobility in old age is a complex phenomenon On the one hand it is a basic human need and means the physical ability to move On the other it means the realization of all types of trips out of doors either by foot or by means of transportation In addition societal and individual necessities modern values and economic interests mutually

reinforcing each other have resulted in mobility as an ever more important precondition of ensuring the ability to lead an autonomous life and participate actively in society according to one's individual needs. Mobility also promotes healthy ageing, delays the onset of disabilities and postpones frailty, thereby contributing to subjective well-being and life satisfaction. With advancing age, however, maintaining mobility may become jeopardized because of the increasing risk of physical and sensory impairments. This book includes information on older people's actual out-of-home mobility, on the transportation tools used, the prevalence of typical problems associated with out-of-home mobility, the impact of health, social networks, the home and neighbourhood environments and psychological aspects on their mobility and activities, differences between urban and non-urban areas and age and gender differences. In addition, a new model of mobility is suggested and the relation between mobility and quality of life is analysed. The book concludes with implications for social and transport policies, urban planning and industrial pursuits for meeting the mobility needs of ageing adults.
