

Concept Paper: Bullying

The bill, now a law defines acts of bullying in schools and authorizes these institutions to impose sanctions on student bullies. Bullying is the most common form of violence in schools, not only in elementary and secondary schools but also in tertiary level schools may it be state universities, school foundations or private colleges and universities. Students are ridiculed, taunted, teased, mocked and made fun of by fellow students who think or feel that they can get away with such behavior because they are superior, or great than the students they bully.

Schools and its administrators are always in a dilemma as to they would address bullies in the amp's. In previous news, a student from a very prestigious private school was a victim when a father of a classmate brought a gun in school toted it to a student inside the classroom. This was a very controversial issue that may have somehow hastened the passing of the anti-bullying law. A recent news also tackled about bullying in which a 12 year - old victim committed suicide by hanging herself due to depression from being bullied by her classmates.

It is therefore imperative for schools to come up with programs to promote such law and to make students aware of what they could do about the issue. It is the aim of this research to find out how knowledgeable or to determine the General Santos Doctors' Medical School Foundation Incorporated students' level of awareness about this matter and how they could help deter future bullies. Students' level of awareness will best serve as a basis on the development of possible intervention programs for the institution to prevent their students' sense of security.

Also, this study will answer if what are the common grounds and impacts of bullying among the students of General Santos Doctors' Medical School Foundation Incorporated. Target Respondents: Target respondents of the study are students in college level enrolled at and General Locale: The area of coverage for the study is limited to the college students from General Santos Doctors' Medical School Foundation Incorporated.

Cyberbullying through the New Media Peter Smith,Georges Steffgen,2013-12-04

Cyberbullying is one of the darker and more troubling aspects to the growing accessibility of new media technologies. Children in developed countries engage with cyberspace at younger and younger ages and the use of the internet as a means to bully and harass has been greeted with alarm by educationalists, parents, the media and governments. This important new book is the result of a four year international collaboration funded by the EU to better understand how we can cope and confront cyberbullying and how new media technologies can be used to actually support the victims of such abuse. The articles initially define the historical and theoretical context to cyberbullying before examining key issues involved in managing this pervasive phenomenon. Coverage includes: The definition and measurement of cyberbullying; The legal challenges in tackling cyberbullying across a number of international contexts; The role of mobile phone companies and Internet service providers in monitoring and prevention; How the media frame and present the issue and how that influences our understanding; How victims can cope with the effects of cyberbullying and the guidelines and advice provided in different countries; How cyber bullying can continue from school into further education and the strategies that can be used to prevent it; The ways in which accessing youth voice or maximising the contribution of young people themselves to the research process can enhance our understanding. The book concludes with practical guidance to help confront the trauma that cyberbullying can cause. It will be a valuable resource for researchers, students, policy makers and administrators with an interest in how children and young people are rendered vulnerable to bullying and harassment through a variety of online channels.

Detox Your Writing Pat Thomson, Barbara Kamler, 2016-02-26

There are a number of books which aim to help doctoral researchers write the PhD. This book offers something different: the scholarly detox. This is not a faddish alternative; it is not extreme. It is a moderate approach intended to gently interrupt old ways of doing things and establish new habits and orientations to writing the PhD. The book addresses the problems that most doctoral researchers experience at some time during their candidature: being unclear about their contribution, feeling lost in the literature, feeling like an imposter, not knowing how to write with authority, wanting to edit rather than revise. Each chapter addresses a problem, suggests an alternative framing and then offers strategies designed to address the real issue. Detox Your Writing is intended to be a companionable work book, something doctoral researchers can use throughout their doctorate to ask questions about taken-for-granted ways of writing and reading and to develop new and effective approaches. The authors' distinctive approach to doctoral writing mobilises the rich traditions of linguistic scholarship as well as the literatures on scholarly identity formation. Building on years of expertise, they place their emphasis both on tools and techniques as well as the discursive practices of becoming a scholar. The authors provide a wide repertoire of strategies that doctoral researchers can select from rather than a linear, lock-step progression through a set of exercises. The book is a toolkit but a far from prescriptive one. It shows that there are many routes to developing a personal academic voice and identity and a well-crafted text. With points for reflection alongside examples from a broad range of disciplines, the book offers thinking tools, writing tools, linguistic tools and reading

tools which are relevant to all stages of doctoral research This practical text can be used in all university doctoral training and composition and writing courses However it is not a dry how to do it manual that ignores debates or focuses solely on the mechanical at the expense of the lived experience of doctoral research It provides a practical theorised real world guide to postgraduate writing
