Carl Maria von Weber Joseph E. Morgan, 2014-09-11 Renowned music historian Philipp Spitta has written that of all the German musicians of the 19th century none has exercised a greater influence over his own generation and that succeeding it than Weber Spitta's statement reflects Weber's popularity at the end of the nineteenth century both for his place as a foundational figure of German Romantic opera and for his role in the early German Nationalist movement in music Indeed Weber's *Der Freischütz* is still considered the first German Romantic opera enjoying a place of privilege in the modern operatic repertoire with performances held the world over and at least two cinematic productions Despite its enormous popularity throughout the nineteenth century however Weber's swan song *Oberon* has remained separate from the mainstream thrust of our modern understanding of German Romantic opera In *Carl Maria von Weber: Oberon and the Cosmopolitanism in the Early German Romantic* music historian and theorist Joseph E Morgan reassesses Weber's work and aesthetics not just for their influence but also as an expression of the aesthetics and cosmopolitanism that underlay the early Romantic and Nationalist movement in Germany In a discussion with analyses that features nearly one hundred musical examples Morgan tracks the development of Weber's musical style across his career The investigation culminates with Weber's last and long misunderstood work explaining its thematic and harmonic organization its stylistic idiosyncrasies and the tenuous place that it holds on the margins of the operatic canon The discussion is enhanced and corroborated by frequent attention to correlating developments in other art from the period including painting poetry and literature This text will be of interest to students scholars and connoisseurs wishing to acquire a new insight on the performance reception and aesthetics of early German Romantic opera Further because of the interdisciplinary nature of the investigation anyone researching the early Romantic and Nationalist movement in Germany will also certainly find valuable insights in this book

Analysis of Glass Panels Subjected to Blast Load Matthias Förch, 2019-04-11 The present doctoral dissertation contributes to the analysis of glass panels subjected to blast load concentrating on monolithic and laminated glass prior to glass fracture A straightforward graphical solution for monolithic glass is presented to identify maximum deformation and maximum principal stress for small and large deformations for static and idealized blast load without software On the basis of experimental tests load duration factors k_{mod} for impact and blast load design for annealed glass heat strengthened glass and fully tempered glass are proposed In addition design strength values for impact and blast design based on the European and German standards are suggested As a result blast pressure capacity charts for monolithic fully tempered glass plates subjected to idealized blast load are presented Moreover design temperatures of interlayer in blast design situation based on empirical data in accordance with Eurocode are determined for vertical doubleglazed and triple glazed units for Germany showing that laminated glass should not be regarded with monolithic glass approach in general
