**Qualitative Theory of Parabolic Equations, Part 1** T. I. Zelenyak,M. P. Vishnevskii,M. M. Lavrentiev,2011-09-06 No detailed description available for Qualitative Theory of Parabolic Equations Part 1     *Numerical Solution of Time-Dependent Advection-Diffusion-Reaction Equations* Willem Hundsdorfer,Jan G. Verwer,2013-04-17 This book deals with numerical methods for solving partial differential equations PDEs coupling advection diffusion and reaction terms with a focus on time dependency A combined treatment is presented of methods for hyperbolic problems thereby emphasizing the one way wave equation methods for parabolic problems and methods for stiff and non stiff ordinary differential equations ODEs With regard to time dependency we have attempted to present the algorithms and the discussion of their properties for the three different types of differential equations in a unified way by using semi discretizations i.e the method of lines whereby the PDE is transformed into an ODE by a suitable spatial discretization In addition for hyperbolic problems we also discuss discretizations that use information based on characteristics Due to this combination of methods this book differs substantially from more specialized textbooks that deal exclusively with numerical methods for either PDEs or ODEs We treat integration methods suitable for both classes of problems This combined treatment offers a clear advantage On the one hand in the field of numerical ODEs highly valuable methods and results exist which are of practical use for solving time dependent PDEs something which is often not fully exploited by numerical PDE researchers Although many problems can be solved by Euler's method or the Crank Nicolson method better alternatives are often available which can significantly reduce the computational effort needed to solve practical problems

### **Fractional**

**Dispersive Models and Applications** Panayotis G. Kevrekidis,Jesús Cuevas-Maraver,2024-04-15 This book explores the role of fractional calculus and associated partial differential equations in modeling multiscale phenomena and overlapping macroscopic microscopic scales offering an innovative and powerful tool for modeling complex systems While integer order PDEs have a long standing history the novel setting of fractional PDEs opens up new possibilities for the simulation of multi physics phenomena The book examines a range of relevant examples that showcase the seamless transition from wave propagation to diffusion or from local to non local dynamics in both continuum and discrete systems These systems have been argued as being particularly relevant in contexts such as nonlinear optics lattice nonlinear dynamical systems and dispersive nonlinear wave phenomena where the exploration of the potential fractionality has emerged as a highly active topic for current studies The volume consists of contributions from a diverse group of active scholars and experts across different fields providing a detailed examination of the field's past present and future state of the art in the interplay of

fractional PDEs and nonlinear wave phenomena It is intended to be of wide interest to both seasoned researchers and beginners in the Field of Nonlinear Science This book sets the stage for the next decade of research and beyond and is a timely and relevant reference of choice for this crucial junction of current research     *Design and Analysis in Chemical Research* Roy L. Tranter,2000 Providing the reader with a user friendly approach to this challenging field this book covers the principles of design and analysis in chemical research and development Organized in chapters dealing with major activities this volume generates understanding through numerous examples and practical applications drawn from research and development chemistry The authors concentrate on principles and interpretation rather than formal derivation and proof and adopt the unifying theme that statistics and chemometrics are extensions of the logical processes used by chemists every day which allows a greater understanding of problems more easily than intuitive methods     **Graphene Science**

**Handbook, Six-Volume Set** Mahmood Aliofkazraei,Nasar Ali,William I. Milne,Cengiz S. Ozkan,Stanislaw Mitura,Juana L.
