Travelling Waves in Nonlinear Diffusion-Convection Reaction

Brian H. Gilding, Robert Kersner, 2012-12-06 This monograph has grown out of research we started in 1987 although the foundations were laid in the 1970 s when both of us were working on our doctoral theses trying to generalize the now classic paper of Oleinik Kalashnikov and Chzhou on nonlinear degenerate diffusion Brian worked under the guidance of Bert Peletier at the University of Sussex in Brighton England and later at Delft University of Technology in the Netherlands on extending the earlier mathematics to include nonlinear convection while Robert worked at Lomonosov State University in Moscow under the supervision of Anatolii Kalashnikov on generalizing the earlier mathematics to include nonlinear absorption We first met at a conference held in Rome in 1985 In 1987 we met again in Madrid at the invitation of Ildefonso Diaz where we were both staying at La Residencia As providence would have it the University Complutense closed down during this visit in response to student demonstrations and we were very much left to our own devices It was natural that we should gravitate to a research topic of common interest This turned out to be the characterization of the phenomenon of finite speed of propagation for nonlinear reaction convection diffusion equations Brian had just completed some work on this topic for

nonlinear diffusion convection while Robert had earlier done the same for nonlinear diffusion absorption There was no question but that we bundle our efforts on the general situation *NEET 5000+ Chapter-wise SURESHOT Graded Problems in Physics, Chemistry & Biology 2nd Edition* Disha Experts,2019-11-14 Exercise Biochemistry Vassilis Mougios,2020 Exercise Biochemistry Second Edition offers a clear explanation of how exercise affects molecular level functioning in athletes and nonathletes both healthy and diseased *Ebook: Physical Science* Tillery,2016-04-16 Ebook Physical Science
