Proposed Groundfish Acceptable Biological Catch and Optimum Yield Specifications and Management Measures, 2003 Pacific Coast Groundfish Fishery, 2003

Farming in the First Millennium AD P. J. Fowler, 2002-11-14 Peter Fowler has written an authoritative account of farming in Britain in the first millennium AD This is the first synthesis of our knowledge on this topic for a generation Successive chapters assemble and analyse the latest evidence on farms fields technology food diet and society New interpretations are offered on subjects ranging from implements to illuminated manuscripts and evidence drawn from Northern England Scotland and Wales contributes significantly to the story The book concludes with a magisterial review of the ways in which agriculture shaped early Britain's societies and landscapes It also proposes a chronological model of British agriculture for the whole millennium

Wildland Fires and Air Pollution Andrzej Bytnerowicz, 2009 Wildland fires are one of the most devastating and terrifying forces of nature While their effects are mostly destructive they also help with regeneration of forests and other ecosystems Low

intensity fires clear accumulating biomass reducing risk of catastrophic crown fires and can be used as an effective management tool This book presents current understanding of wildland fires and air quality as well as their effects on human health forests and other ecosystems in the first section of the book the basics of wildland fires and resulting emissions are presented from the perspective of changing global climate air quality impairment and effects on environmental and human health and security in the second section effects of wildland fires on air quality visibility and human health in various regions of the Earth are discussed The third section of the book deals with complex issues of the ecological impacts of fires and air pollution in forests and chaparral in North America The fourth section discusses various management issues facing land and fire managers which are related to wildfires use of prescribed fires and air quality This section also presents various modeling systems used for describing fire dangers and behavior as well as smoke and air pollution predictions applied in the risk assessment analysis The book concludes with a series of expert recommendations for wildland fire and atmospheric research

Eugene-Medford 500 KV Transmission Line, Proposed, 1983 *Water Management* Shimon C. Anisfeld, 2024-06-27 Flooding in California Drought and famine in the Horn of Africa Massive fish kills in Texas and Australia Forever chemicals in US drinking water Similar headlines are sure to dominate the news in the years ahead What is sometimes missing from the headlines though is an understanding that these diverse problems are related manifestations of serious underlying stresses on our water systems These stresses require sustained attention from water managers scientists policymakers and the public even after the headlines have faded That attention in turn requires a shared understanding of how water systems function the problems facing them and the tools available to increase their resilience This text fills that need by providing the necessary knowledge base for understanding and managing complex water problems It is geared primarily towards students in water management courses at the undergraduate and graduate levels but will also be a helpful resource for practicing water professionals who want to get new ideas or a broader view of the subject Rather than focusing on one type of water problem as many water books do this text explores the entire gamut of water issues from dams to desalination from flooding to famine from prior appropriation to pumped storage from sanitation to stormwater And rather than teaching from one disciplinary perspective as many water books do it looks at water problems through a variety of lenses hydrology climate science ecology and engineering but also law economics history and environmental justice The result is a concise yet comprehensive introduction to one of the most critical and demanding challenges of our time developing just and sustainable solutions to water management

Investing in Disaster Risk Reduction for Resilience A. Nuno Martins, Gonzalo Lizarralde, Temitope Egbelakin, Liliane Hobeica, Jose Manuel Mendes, Adib Hobeica, 2022-03-15 Disaster prevention and the mitigation of climate change effects call for global action Joint efforts are required among countries economic sectors and public and private stakeholders Not surprisingly international organizations such as the United Nations agencies propose policy frameworks aimed at worldwide influence The 2015 Sendai Framework seeks to create consensus about the need to act for disaster risk reduction and climate adaptation A key goal is to promote investments in risk reduction and resilience But how useful is this policy framework What does it say and what does it overlook How can it be implemented among vulnerable communities in historic sites and in other sensitive locations affected by disasters In this book prominent scholars and practitioners examine the successes and failures of the Sendai Framework Their case studies show that despite its good intentions the Framework achieves very little The main reason is that while avoiding a political engagement it fails to deal with disasters root causes and guide the difficult path of effective implementation The authors bring a fresh look to international policy and design practices highlighting cross disciplinary research avenues and ideas and methods for low income communities cities and heritage sites in Portugal Haiti the United States the Philippines New Zealand Sri Lanka Nigeria among other countries Global action requires collaboration between heterogeneous stakeholders but also the recognition of inequalities power imbalances and social and environmental injustices Analyzes outcomes and drawbacks of implementing the third priority of the Sendai Framework for Disaster Risk

Reduction Presents real life attempts to increase risk resilience and climate change adaptation both before and after disasters Addresses design as a means to build resilience in community and heritage interventions Calls for embracing the complexities and dynamic character of DRR and climate change knowledge investment and communication Fundamentals of Evapotranspiration Alessia Corami,Saeid Eslamian,Faezeh A. Eslamian,2024-10-22 Fundamentals of Evapotranspiration aims to determine simple methods to evaluate evapotranspiration and to examine the evolution of these methods over time It compares and contrasts best practices and discusses the opportunities for harmonization among various methods Further the book discusses optimal calibration of these methods in a local context depending on particular climates and scenarios The book serves as a practical resource for students and professionals working in agriculture irrigation and water engineering and will aid in evaluating the methods and equations for the most efficient means of evapotranspiration The authors examine the methods for evaluating evapotranspiration considering the evaporation from water surfaces soil and vegetation The authors address issues according to various regions climates and soil types and apply the optimal solution for each situation
