Rethinking Undergraduate Business Education Anne Colby,Thomas Ehrlich,William M. Sullivan,Jonathan

R. Dolle, 2011-04-20 Business is the largest undergraduate major in the United States and still growing. This reality along with the immense power of the business sector and its significance for national and global well being makes quality education critical not only for the students themselves but also for the public good. The Carnegie Foundation for the Advancement of Teaching's national study of undergraduate business education found that most undergraduate programs are too narrow, failing to challenge students to question assumptions, think creatively, or understand the place of business in larger institutional contexts. *Rethinking Undergraduate Business Education* examines these limitations and describes the efforts of a diverse set of institutions to address them by integrating the best elements of liberal arts learning with business curriculum to help students develop wise, ethically grounded professional judgment. **Student Successes With Thinking Maps®**

David N. Hyerle, Larry Alper, 2011-01-15 Students of all ages and stages of development can profit from the clarity that Thinking Maps provide. Bena Kallick, Co-Director, Institute for Habits of Mind, Westport, CT. This is one of the rare books that links research and practice to show the true impact of a specific instructional approach on student learning. The research experiences from the field vignettes and work samples are excellent. Giselle O. Martin, Kniep, President, Learner-Centered Initiatives Ltd, Floral Park, NY. Use Thinking Maps as a GPS for student success. Neuroscientists tell us that the brain organizes information in networks and maps. What better way to teach students to express their ideas than with the same method used by the brain? *Student Successes With Thinking Maps* presents eight powerful visual models that boost all learners' metacognitive and critical thinking skills. Enriched with new research, a wealth of examples, and cross-content applications, the book also shows how Thinking Maps serve as valuable assessment tools. This novel and effective model helps students organize thoughts, examine relationships, enhance reasoning skills, create connections between subjects, engage with content. The visual nature of Thinking Maps helps level the playing field and is ideal for inclusive settings. Additionally, educators have found that using Thinking Maps for professional development can improve teacher performance, build leadership skills, and raise students' scores on high-stakes tests. If your goal is to transform your school's culture, Thinking Maps will put you on the road to success. **Music, Power, and Politics**

Child Development: Thinking About Theories Texts in Developmental Psychology

Phillip T Slee, Rosalyn Shute, 2014-02-04 *Child Development Thinking About Theories* is one of the few texts to critically examine both modern and postmodern contributions to theoretical development in child and adolescent psychology. The text has been written specifically taking into account the findings from a focus group of Honours psychology students to include pedagogical features such as an overview of theories linking the various schools of thought, ideas for further study and links to selected websites as well as the latest developments in theoretical thinking including evolutionary theory, feminism and indigenous theory and **HC 111-II House of Commons - Children, Schools and Families Committee: Looked-after Children, Volume II** Barry Sheerman, Great Britain. Parliament House of Commons. Children, Schools and Families Committee, 2009 Localism Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2011-06-09 This report finds that the Government's desire to deliver localism is neither supported consistently across Whitehall nor implemented coherently by each department of state. MPs warn that the Minister for Decentralisation will need to bring coherence, rigour and clear priorities to the Government's programme. The MPs call for a more explicit statement about where the dividing line will be drawn between a central light touch framework for local services and unwarranted interference from ministers in local affairs. So far the Government has shown itself all too eager to impose its preferences on local decision making. Ministers have also introduced policies that circumvent rather than empower local government. Elected police commissioners, free schools, academies and health service reform threaten to fragment rather than integrate delivery of better public services at local level. As devolution proceeds, the manner in which local decisions are taken come under greater scrutiny. Any reduction in the inspection and performance management required by Whitehall must be accompanied by stronger local democratic accountability. Broadening the provider base for public services is an important plank of the Government's decentralisation agenda but it remains unclear how far the Big Society can expand to take on services and functions shed by statutory bodies. Localism should not be adopted purely as a way to curb public sector costs not least because the financial benefits of more tailored services may not offset the loss of efficiencies of scale. Stimulating greater democratic participation and civic activism will itself cost money if it is to be successful and sustainable Critical Reasoning in Contemporary Culture Richard A. Talaska, 1992-01-01 Here we have for the first time in a single volume diverse perspectives on the meaning, conditions and goals of critical reasoning in contemporary culture. Part One emphasizes critical reasoning and education, engaging the debate over the connection between critical reasoning skills and the learning of the content. Part Two offers analyses of the theoretical, methodological and historical debates concerning critical reasoning abilities. The authors represent a variety of disciplines and theoretical approaches which lend the book valuable intellectual pluralism. The book evaluates other aspects of critical thinking such as creativity, insight, questioning, learning, practical thought, interpretation, intellectual prejudice and the historical and temporary aspects of thought *Handbook of Tests and Measurement in Education and the Social Sciences* Paula E.
