In addition, it describes statistical methods of quality control, total quality management, quality assurance, raw material, which are used in making of steel. The major contents of the handbook are: fusion welding processes, grinding and abrasive processes, width change by rolling, and pressing metallurgical defects in cast slabs and hot rolled products, primary steel making processes, optimization and control of width change process, fundamentals of metal casting, steel making technology, basic principles of width change plate mills, hot strip mills, quality assurance, testing and inspection, bar and rod mills.
