Byzantine Visual Culture in the Danube Regions, 1300-1600 Maria Alessia Rossi, Alice Isabella Sullivan, 2024-02-22 This volume aims to broaden and nuance knowledge about the history art culture and heritage of Eastern Europe relative to Byzantium From the thirteenth century to the decades after the fall of Constantinople in 1453 the regions of the Danube River stood at the intersection of different traditions and the river itself has served as a marker of connection and division as well as a site of cultural contact and negotiation The Routledge Handbook of Byzantine Visual Culture in the Danube Regions 1300 1600 brings to light the interconnectedness of this broad geographical area too often either studied in parts or neglected altogether emphasizing its shared history and heritage of the regions of modern Greece Croatia Serbia Bulgaria Romania Hungary Slovakia and Czechia The aim is to challenge established perceptions of what constitutes ideological and historical facets of the past as well as Byzantine and post Byzantine cultural and artistic production in a region of the world that has yet to establish a firm footing on the map of art history The 24 chapters offer a fresh and original approach to the history literature and art history of the Danube regions thus being accessible to students thematically chronologically or by case study each part can be read independently or explored as part of a whole

How to Enjoy Architecture Charles Holland, 2024-04-23 Charles Holland challenges us to look beyond the day to day familiarity of buildings to rediscover the pleasure of experiencing architecture Architecture is bound up with our daily lives but for most of us it is experienced as a blur of habit Our reactions towards the buildings that surround us are often culturally generated and we experience them in ways that are immediate but often mundane How to Enjoy Architecture A Guide for Everyone encourages us to move beyond this and instead really look at buildings Renowned architect Charles Holland talks about the buildings and architects that excite and inspire him and the ideas and principles through which we can engage with architecture By breaking buildings down into categories such as materials structure space and use Holland guides us through drastically different styles and building types from the satisfying symmetry of a Queen Anne house to the thrill of a high tech tower or the social ideals that lie behind a housing estate In doing so he demonstrates how looking at experiencing and using architecture can bring joy in itself A book that will enrich any encounter with a building it made me want to look harder and be more curious We are led playfully through the fundamentals of architecture so that we might enjoy the details and the poetry of buildings all the more A walk through the city feels more fun and also more profound after reading this book Grayson Perry artist We so often encounter architecture when it goes wrong or offends us with its looks Holland though is the perfect clear headed tour guide to help us appreciate it with newly sharpened senses and fall in love again even those buildings we think we hate Tom Dyckhoff academic and broadcaster An enlightening and urbane exploration of architecture that resonates beyond conventional chronological histories Catherine Slessor architecture writer and critic

The Oxford History of British and Irish Catholicism, Volume II John Morrill, Liam Temple, 2023-09-01 The second volume of The Oxford History of British Irish Catholicism traces

the fortunes of Catholic communities in England Wales Scotland and Ireland across a period of great uncertainty and change From the outset of the Civil Wars in 1641 to the Jacobite rising of 1745 Catholics in the three kingdoms were varied in their responses to tumultuous events and tantalising opportunities The competing forces of dynamism and conservatism within these communities saw them constantly seeking to re situate or re imagine themselves as their relationship to the state to Protestantism to continental Europe as well as the wider world beyond changed and evolved Consciously transnational the volume moves away from insular conceptualisations of Catholicism and instead stresses connections with the European continent and beyond Early chapters give broad overviews of the experience of Catholics in the period tracking key events and important developments from 1641 to 1745 Chapters then address specific aspects of Catholicism including empire and overseas missions missionary activity devotion spirituality trade material culture music and architecture among others revealing a complex rich and varied history of Catholicism in the period

The Architecture of Ruins Jonathan Hill, 2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change
