Full-Size Ford Restoration: 1960-1964 Collin Kleer, 2017-08-15 Ford's full size model change from 1959 to 1960 was seen as a big departure from the swerving lines of the 1950s. Slow to start on sales, Ford's full size production grew year after year peaking with 648,010 units produced in 1963. It was an all time best for the Galaxie line and its sister nameplates. Eight appearance and performance offerings were applied to the full size Ford line including the Fairlane, Galaxie, Ranch Wagon, Country Sedan, Country Squire, Courier 300 and Custom which made each car unique. With more than 2.3 million full size Fords produced from 1960 to 1964, a restoration book for these cars has been desperately needed and here it is. Author Colin Kleer, president of Pennsylvania's Three Rivers chapter of the Galaxie Club, puts his decades of experience restoring these cars into this single volume. Featuring step by step procedures on body, driveline, chassis and interior components, Kleer shows with more than 400 photos and text how to restore a full size Ford to its former glory. Crucial projects such as rust repair and driveline maintenance help guarantee that your Ford will be sound and solid for years to come after the restoration. The Galaxie and its full size stablemates continue to be a strong force at car shows and in the marketplace; they create an even deeper following for these cars. Adding a detailed restoration book to the full size restorers arsenal will surely aid in bringing more of these Fords back to life and back on the road.

High-Performance Ignition Systems Todd Ryden, 2014-01-15 Complete guide to understanding automotive ignition systems.

VW Air-Cooled Engines Dr. John F. Kershaw, 2023-02-15 The VW Beetle, officially the Volkswagen Type 1, needs no introduction. Manufactured and marketed globally by Volkswagen from 1938 to 2003, more than 21 million were produced and sold around the world. The car was extremely popular in the US and Europe during the 1950s and 1960s. However, increasing competition from Japanese, American and European manufacturers as well as stiffening demands for better safety and emissions contributed to a sharp decline in sales in the early 1970s. The Beetle was manufactured in much smaller numbers in Germany until the late 1970s when production shifted to Brazil and Mexico where operating cost was a large factor in keeping the Beetle alive. While simple and fun, the Beetle had simply become outdated. Of course the enthusiast market did not see it that way. Aficionados loved the simplicity in the design as well as its aesthetics and they enjoyed tinkering with the mechanicals of their Beetles. Buses, Type 3 models and Karmann Ghias. There was and still is no shortage of options when customizing your Beetle and for many extracting as much performance out of the air cooled flat 4 was the way to go. Not only does it remedy the issue of keeping up with modern traffic but Beetles also
