cognitive science informatics and anthropology interrogates how medieval people and groups envisioned and enforced predictability uniformity and order and how they attempted to obtain and maintain standards across vast distances and heterogeneous social and cultural structures

Ad Quadratum Nancy Y. Wu, 2017-03-02 The purpose of the project is to provide the most up to date survey on issues dealing with practical geometry and how it might have been applied in the design of medieval architecture Chronologically the topics cover a wide span from early Medieval through Late Gothic Geographically the monuments under discussion range from Early Medieval Florence through Carolingian Germany Crusader Cyprus Romanesque France and Gothic England The applications of both geometry and metrology are considered in this volume often with illustrations generated by computer assisted design CAD software The project therefore offers recent scholarship in the field as well as cutting edge technology which helps propel the pursuit of such studies To this end the project is the first of its kind both in terms of its focus and its comprehensiveness Such a project is sorely needed to introduce this highly specialized discipline to other historians of art history and science of the Middle Ages as well as historians in most humanistic areas
