

All of the following reactions involve at least one pericyclic process (a number of the problems involve multiple pericyclic processes).

In each case:

- i) provide a mechanism for the reactions
- ii) identify the pericyclic process or processes
- iii) assign them to their class
- iv) show they are allowed using either the Woodward-Hoffmann rules or an FMO analysis
- v) Predict the stereochemical outcome of the reaction where it is not shown (wavy bond) or rationalise the stereochemical outcome where it is shown.
