written in Latvian This of course does not preclude Latvian speakers from using it to translate from Latvian into English i e to produce English texts English speaking Latvians may in fact find it helpful for accurate and natural translation Other features of this dictionary are the number of entries over 106 000 which is more than double that of any other Latvian English dictionary the use of American rather than British English an extensive coverage of technical terms from all fields of science and technology the comprehensive inclusion of spelling variants and the inclusion of colloquialisms common speech words vulgar terms slang barbarisms selected regionalisms and terms found in folkloric language A dictionary of Latvian proverbs is included in the back The entries of this dictionary were collected from various extant monolingual and bilingual Latvian dictionaries general and specialized spelling dictionaries technical dictionaries etymological dictionaries general encyclopedias periodical literature and many Latvian speakers Of the latter I want to single out the contribution of the late sea captain Inats Lejnieks In his time the captain had commanded full rigged sailing ships with Latvian crews and he supplied the Latvian equivalents of the names of sails and principal ropes spars and part of the hull I was fortunate to have captain Lejnieks share his expertise with me as this material was not available anywhere else
