The Eurocodes are a series of 10 European Standards EN 1990-EN 1999 that provide a common approach for the design of buildings, other civil engineering works and construction products. The design standards embodied in these Eurocodes will be used for all European public works and are set to become the de facto standard for the private sector in Europe with probable adoption in many other countries. This classic manual on structural steelwork design was first published in 1955 since when it has sold many tens of thousands of copies worldwide. For the seventh edition of the Steel Designers Manual, all chapters have been comprehensively reviewed, revised to ensure they reflect current approaches and best practice and brought in to compliance with EN 1993 Design of Steel Structures, the so-called Eurocode 3. *NBS Special Publication*, 1975. *An Index of U.S. Voluntary Engineering Standards. Owens, 2008-04-15 This classic manual on structural steel design provides a major source of reference for structural engineers and fabricators working with the leading construction material. Based fully on the concepts of limit state design, the manual has been revised to take account of the 2000 revisions to BS 5950. It also looks at new developments in structural steel, environmental issues and outlines the main requirements of the Eurocode on structural steel. *ASCE Manuals and Reports on Engineering Practice*, 1962. **Industrial Construction File**, 1960. **Iron Age**, 1912.
