the World Donald W. Duszynski, Jana Kvičerová, R. Scott Seville, 2018-06-29 The fundamental concept of *The Biology and Identification of the Coccidia Apicomplexa of Carnivores of the World* is to provide an up to date reference guide to the identification taxonomy and known biology of apicomplexan intestinal and tissue parasites of carnivores including but not limited to geographic distribution prevalence sporulation prepatent and patent periods sites of infection in the definitive and if known intermediate hosts endogenous development cross transmission pathology phylogeny and if known their treatments

These data will allow easy parasite recognition with a summation of virtually everything now known about the biology of each parasite species covered. The last very modest and only treatise published on this subject was in 1981 so this book fills a fundamental gap in our knowledge of what is now known and what is not about the coccidian parasites that infect and sometimes kill carnivores and or their prey that can harbor intermediate stages including many domestic and game animals. Offers line drawings and photomicrographs of many parasite species that will allow easy diagnosis and identification by both laypersons and professionals veterinarians wildlife biologists etc. Presents a complete historical rendition of all known publications on carnivore coccidia for all carnivore families and evaluates the scientific and scholarly merit of each apicomplexan species relative to the current body of knowledge. Provides a complete species analysis and their known biology of all coccidia described from each carnivore lineage and species. Reviews the most current taxonomy of carnivores and their phylogenetic relationships to help assess host specificity patterns that may be apparent. Evaluates what little cross transmission work is available to help understand the complexities of those coccidians that use two hosts e.g. *Sarcocystis*, *Besnoitia* and others. Provides known treatments for the various parasite genera species.

XV International Scientific Conference "INTERAGROMASH 2022" Alexey Beskopylny, Mark Shamtsyan, Viktor Artiukh, 2023-02-24. The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022 Rostov on Don Russia. This conference is dedicated to the innovations in the field of precision agriculture robotics and machines as well as agriculture biotechnologies and soil management. It is a collection of original and fundamental research in such areas as follows: unmanned aerial systems, satellite based applications, proximal and remote sensing of soil and crop, positioning systems, geostatistics, mapping and spatial data analysis, robotics and automation. Potential and prospects for the use of hydrogen in agriculture, for example in high performance tractors with hybrid electric transmission, are disclosed in the research works of scientists from all over the world. It also includes such topics as precision horticulture, precision crop protection, differential harvest, precision livestock farming, controlling environment in animal husbandry and other topics. One of the important issues raised in the book is to ensure the autonomy of local farms. The topic of the impact of the agro industrial sector on the environment also received wide coverage. Ways to reduce the burden on the environment are proposed and the use of alternative fuels and fertilizers is suggested. The research results presented in this book cover the experience and the latest studies on the sustainable functioning of agribusiness in several climatic zones: The tundra and taiga, forest steppe, the steppe and semi desert, all this is a unique and incredibly demanded bank of information, the main value of which is the real experience of the functioning of agribusiness in difficult climatic and geographic conditions. These materials are of interest for professionals and practitioners for researchers, scholars and producers. They are used in the educational process at specific agricultural universities or during vocational training at enterprises and also become an indispensable helper to farm managers in making the best agronomic decisions.
