The Collegiate Athlete at Risk Morris R. Council, Samuel R Hodge, Robert A. Bennett, 2018-09-01 There are numerous books documenting the challenges of student athletes and presenting recommendations for academic success They primarily focus on understanding the issues of student athletes and recommendations are oftentimes overly simplistic failing to explicitly provide interventions that can be executed by student athlete support personnel In addition the topic of supporting student athletes who are academically at risk and or are diagnosed with high incidence disabilities has been overlooked by scholars resulting in few publications specifically focusing on providing strategies to the staff personnel who serve these populations The general target audience is college university practitioners who interface with student athletes who demonstrate academic and social risk in the realm of athletics These stakeholders include but are not limited to academic support staff student athletes parents coaches faculty educators counselors psychologists higher education administrators student affairs professionals disability services coordinators personnel as well as researchers who focus on education leadership sports and special education All of these groups are likely to find this book attractive especially as they work with student athletes who are at risk for academic failure Also it is ventured that this book will become the staple text for the National Association of Academic Advisors N4A the official organization for all personnel who work in collegiate academic support and can be used by members of intercollegiate athletic associations to reform policies in place to support at risk student athletes NCAA Convention Proceedings National Collegiate Athletic Association, National Collegiate Athletic Association. Encyclopedia of Sport Management Paul M Pedersen, 2024-09-06 This thoroughly updated second edition of the Encyclopedia of Sport Management is an authoritative reference work that provides detailed explanations of critical concepts within the field

Unsportsmanlike Conduct Paul R. Lawrence, 1987-09-09 Lawrence an economist football fan and official is an authoritative and astute critic of what is wrong with football in higher education as regulated by the NCAA Lawrence believes the NCAA has become a cartel that keeps expenses low by rewarding the players almost nothing comparable to their contribution This is not the book for a novice interested in the razzle dazzle of sports but it is highly recommended for one who wants to understand the present situation and efforts some misguided to control the sport Lawrence makes an in depth analysis of the symbiotic relationship between football the NCAA and academia The most valuable part of the book is that Lawrence after carefully defining the situation suggests some solutions Choice

Unsportsmanlike Conduct is the first single source to trace the history of the 80 year old National Collegiate Athletic Association and to explain its growth from a small group seeking safer football rules to the large powerful regulatory body that it is today This volume not only provides a unique view but also an economic analysis of the college athletic industry The author examines the development of American college football since the late 1800s and shows how the NCAA has turned intercollegiate football into a multi million dollar industry By viewing the structure of this organization from an economic

perspective he demonstrates that the NCAA has acted like many other collusive groups of producers in order to maximize their financial interests by exploiting consumers employees and particularly athletes *Alternative Models of Sports Development in America* B. David Ridpath, 2018-01-16 In the United States the entanglement of sports and education has persisted for over a century Multimillion dollar high school football stadiums college coaches whose salaries are many times those of their institutions presidents psychological and educational tolls on student athletes and high profile academic scandals are just symptoms of a system that has come under increasing fire Institutions large and small face persistent quandaries which do they value more academic integrity or athletic success Which takes precedence prioritizing elite teams and athletes or making it possible for all students to participate in sports How do we create opportunities for academic not just athletic development for players In *Alternative Models of Sports Development in America* B David Ridpath a leading sports development researcher who has studied both the US system and the European club model offers clear steps toward creating a new status quo He lays out four possible alternative models that draw various elements from academic athletic and European approaches His proposals will help increase access of all young people to the benefits of sports and exercise allow athletes to also thrive as students and improve competitiveness The result is a book that will resonate with sports development professionals academic administrators and parents *The Athlete's Game Plan for College and Career* Stephen K. Figler, Howard E.
