## **F332 advanced notice JUNE 2014 \_\_\_\_\_ PREP**

Every year OCR release a piece of information in March that needs to read through, understood and questioned by AS students. It is then questioned in the F332 exam paper in June of that year.

In order to get ready for the advanced notice question (usually the last question on the F332 exam paper) we have a task for you.

### In this pack are :

- >The advanced notice doc for June 2012
- >Q5 from the June 2012 F332 exam paper (covering advanced notice material)
- >Q5 answers
- >The June 2014 F332 advanced notice document  
(remember, this is also available on the school website and you'll be given a copy in the exam.).

### Your task:

Look through the June 2012 materials and try to work out **why** those particular questions (in Q5) were asked. The subject of the advance notice is different, but it's useful F332 material on polymers etc..... that you need to know.

Then read through and try to understand the advance notice material for June 2014. You may find that you have to read around it in revision guides or on the internet in order to fully understand the chemistry in it. Please feel free to annotate / highlight it. You will not be taking this into the exam – it's yours to keep.

Then have a go at predicting questions that could be asked about the advance notice on your F332 paper in June 2014.

**You are asked to prepare between 8 – 12 questions, together with the answers.**

**Please make sure that you have a mix of easy/recall questions, but also some harder Qs .....**

▶*Explain in terms of IMF why .....*?

▶*If polymerisation of flavanols is catalysed by low pH conditions, what does this tell you about the role of carboxylic acids in wines?*

▶*Explain why the reaction between Epicatechin and Gallic acid, in wine, is known as a condensation reaction?*

**Please email** these questions to \_\_\_\_\_ by \_\_\_\_\_

The best ones will then be collated and will be issued to you as part of a tutorial lesson on this on \_\_\_\_\_
