Schema Therapy for Borderline Personality Disorder Arnoud Arntz, Hannie van Genderen, 2020-12-14 Provides clear guidance on utilizing Schema Therapy to reduce BPD symptoms and bring about lasting changes in the patient's personality. People with Borderline Personality Disorder (BPD) struggle with a range of problems that negatively impact virtually every aspect of their lives, such as constantly changing moods, blurred personal identities, impulsive behaviors, interpersonal problems, and episodes of rage. BPD patients are at high risk of self-harm and substance abuse, with approximately 10% of BPD patients dying from suicide. BPD severely affects education, employment, personal relationships, and physical and emotional wellbeing of those suffering from the disorder. Schema Therapy (ST), based on cognitive behavioral therapy and techniques derived from experiential therapies, has been shown to achieve substantial personality improvements in BPD patients. Schema Therapy for Borderline Personality Disorder describes the pioneering BPD therapy based on insights from cognitive behavioral, psychodynamic, humanistic, and developmental theories. Schema Therapy emphasizes the emotional processing of traumatic experiences and the use of the therapeutic relationship to bring about positive change. The text describes ST treatment for BPD in detail, covering the aims and phases of the therapy, treatment planning, cognitive and behavioral methods, specific techniques appropriate to each schema mode, behavioral pattern breaking, termination of therapy, and more. This authoritative volume describes a treatment for patients with Borderline Personality Disorder (BPD) that yields substantial clinical improvement or recovery in most cases.
