Ventilation Design Guidebook addresses the design of air technology systems for the control of contaminants in industrial
workplaces such as factories and manufacturing plants It covers the basic theories and science behind the technical solutions
for industrial air technology and includes publication of new fundamental research and design equations contributed by more
than 40 engineers and scientists from over 18 countries Readers are presented with scientific research and data for
improving the indoor air quality in the workplace and reducing emissions to the outside environment The Guidebook
represents for the first time a single source of all current scientific information available on the subject of industrial
ventilation and the more general area of industrial air technology New Russian data is included that fills several gaps in the
scientific literature Presents technology for energy optimization and environmental benefits A collaborated effort from more
than 60 ventilation experts throughout 18 countries Based on more than 50 million dollars of research and development
focused on industrial ventilation Includes significant scientific contributions from leading ventilation experts in Russia
Presents new innovations including a rigorous design methodology and target levels Contains extensive sections on design
with modeling techniques Content is well organized and easily adaptable to computer applications
