

CAUTION

The upgrade process requires that you stop all attached servers from requesting the storage system to send or receive data, so plan accordingly.

This document describes how to upgrade from Navisphere® Express to Navisphere Manager by installing the Navisphere Manager Enabler on your new or existing AX150-Series storage system. Once the Navisphere Manager Enabler is installed on your storage system, you cannot revert to Navisphere Express.

A new storage system is one that has not been connected to a server or configured for storage. It is just as it was shipped to you. An existing storage system is one that has already been connected to one or more servers and configured for storage.

Since the procedures for managing a storage system with Navisphere Manager are quite different from those for managing a storage system with Navisphere Express, you should familiarize yourself with Navisphere Manager before upgrading to Navisphere Manager. To learn about Navisphere Manager, refer to the *EMC Navisphere Manager Administrator's Guide* in the "Related Documents" section on the AX150 support website or the *EMC AX-Series Navisphere Manager Upgrade Documentation CD*.

To use Navisphere Manager to manage (configure) your storage system, you must upgrade Navisphere Express to Navisphere Manager on your storage system. You can use Navisphere Manager to monitor the operation of your AX-Series storage system without upgrading Navisphere Express to Navisphere Manager on your storage system.
