Q22 Outline a hierarchy of measures for controlling exposures to hazardous substances. (10)

A22 The various stages of the usual hierarchy of risk controls are underlined in this answer.

Elimination or substitution is the best and most effective way of avoiding a severe hazard and its associated risks. Elimination occurs when a process or activity is totally abandoned because the associated risk is too high. Substitution describes the use of a less hazardous form of the substance. There are many examples of substitution, such as the use of water-based rather
