Confronting American Labor Jeffrey W. Coker,2002 Confronting American Labor traces the development of the American left from the Depression era through the Cold War by examining four representative intellectuals who grappled with the difficult question of labor s role in society Since the time of Marx leftists have raised over and over the question of how an intelligentsia might participate in a movement carried out by the working class Their modus operandi was to champion those who suffered injustice at the hands of the powerful From the late nineteenth through much of the twentieth century this meant a focus on the industrial worker The Great Depression was a time of remarkable consensus among leftist intellectuals who often interpreted worker militancy as the harbinger of impending radical change While most Americans waited out the crisis listening to the assurances of President Franklin D Roosevelt the Marxian left was convinced that the crisis was systemic Intellectuals who came of age during the Depression developed the view that the labor movement in America was to be the organizing base for a proletariat Moreover many came from working class backgrounds that contributed to their support of labor

contours of nuclear citizenship through overlapping public discussions about survival Policymakers and citizens disagreed about the scale of civil defense programs and other public safety measures As the public learned more about the dangers of nuclear fallout critics articulated concerns about whether the federal government was operating in its citizens best interests By the early 1960s a significant antinuclear movement had emerged which ultimately contributed to the 1963 nuclear testing ban Atomic Americans tells the story of a thoughtful body politic engaged in rewriting the rubric of rights and responsibilities that made up American citizenship in the Atomic Age
