Charter,Michael Jay Polonsky,2017-09-29 Building on the strengths of the material published in the hugely successful first
edition of Greener Marketing this important new title examines on a global scale the progress of environmental marketing in
the 1990s and considers how social issues are increasingly becoming critical factors in how corporations meet the ever
growing demands and expectations of customers Despite the fact that such issues are increasingly important in marketing
activities around the world it is difficult for practitioners to keep up to date with complex and rapidly changing information
and ideas The purpose of this book is to provide practitioners and academics with best practice examples and actionable
recommendations on how to implement and appraise green marketing activities It will provide information and ideas for
those involved in marketing on how to incorporate environmental and social considerations as well as providing new
perspectives on marketing for environmental managers To achieve a comprehensive viewpoint the book is split into three
sections The first sets out the strategic issues and rationale for green marketing the second addresses tactical issues in more
detail and the third provides detailed international case studies Topics addressed by the global set of contributors include the
growing area of products versus services environmental product development green marketing alliances environmental
communications green consumers eco tourism and environmental marketing in developing countries reener Marketing is not
only a sequel to the successful first volume but redefines global progress towards the successful marketing of greener
products and services *American Magazine* ,1926
