

## Rotter Incomplete Sentence Blank tests

Author name:

Julian Rotter

Published:

1950

### Introduction:

The Rotters incomplete sentence blank is an attempt to standardize the sentence completion method for the use at college level. Forty stems are completed by the subject. These completions are then scored by comparing them against typical items in empirically derived scoring manuals for men and women and by assigning to each response a scale value from 0to6. The total score is an index of maladjustment.

### The Sentence Completion Method:

The sentence completion method of studying personality is a semi structured projective technique in which the subject is asked to finish a sentence for which the first word or words are supplied. As in other projective devices, it is assumed that the subject reflects his own wishes, desires, fears and attitudes in the sentences he makes. Historically, the incomplete sentence method is related most closely to the word association test. In some test incomplete sentences tests only a single word or brief response is called for, the major differences appears to be in the length of the stimulus. In the sentence completion tests, tendencies to block and to twist the meaning of the stimulus words appear and the responses may be categorized in a somewhat similar fashion to the word association method.

### Be sure to make complete sentences.

1. I like.....
2. The happiest time.....
3. I want to know.....
4. Back home.....
5. I regret.....
6. At bedtime.....
7. Boys.....
8. The best.....
9. What annoys me.....
10. People.....
11. A mother.....
12. I feel.....
13. My great fear.....
14. In high school.....
15. I can't.....
