The Routledge Handbook of Disability in Southern Africa Tsitsi Chataika, 2018-07-27 This comprehensive ground breaking southern African centred collection spans the breadth of disability research and practice Reputable and emerging scholars together with disability advocates adopt a critical and interdisciplinary stance to prove challenge and shift commonly held social understanding of disability in traditional discourses frontiers and practices in prominent areas such as inter national development disability studies education culture health religion gender sports tourism ICT theatre media housing and legislation This handbook provides a body of interdisciplinary analyses suitable for the development of disability studies in southern Africa Through drawing upon and introducing resources from several disciplines theoretical perspectives

and personal narratives from disability activists it reflects on disability and sustainable development in southern Africa. It also addresses a clear need to bring together interdisciplinary perspectives and narratives on disability and sustainable development in ways that do not undermine disability politics advanced by disabled people across the world. The handbook further acknowledges and builds upon the huge body of literature that understands the social, cultural, educational, psychological, economic, historical, and political facets of the exclusion of disabled people. The handbook covers the following broad themes: Disability inclusion, ICT and sustainable development, Access to education from early childhood development up to higher education, Disability employment, entrepreneurship and community based rehabilitation, Religion, gender and parenthood, Tourism, sports and accessibility. Compelling narratives from disability activists on societal attitudes toward disability, media advocacy, accessible housing and social exclusion. Thus, this much awaited handbook provides students, academics, practitioners, development partners, policy makers and activists with an authoritative framework for critical thinking and debates that inform policy and practice in incomparable ways with the view to promoting inclusive and sustainable development.

The Routledge Handbook of Disability Arts, Culture, and Media Bree Hadley, Donna McDonald, 2018-12-07. In the last 30 years, a distinctive intersection between disability studies including disability rights advocacy, disability rights activism and disability law and disability arts, culture and media studies has developed. The two fields have worked in tandem to offer critique of representations of disability in dominant cultural systems, institutions, discourses and architecture and develop provocative new representations of what it means to be disabled. Divided into 5 sections: Disability Identity and Representation, Inclusion, Wellbeing and Whole of life Experience, Access, Artistry and Audiences, Practices, Politics and the Public Sphere, Activism, Adaptation and Alternative Futures, this handbook brings disability arts, disability culture and disability media studies traditionally treated separately in publications in the field together for the first time. It provides scholars, graduate students, upper level undergraduate students and others interested in the disability rights agenda with a broad based practical and accessible introduction to key debates in the field of disability art, culture and media studies. An internationally recognised selection of authors from around the world come together to articulate the theories, issues, interests and practices that have come to define the field. Most critically, this book includes commentaries that forecast the pressing present and future concerns for the field as scholars, advocates, activists and artists work to make a more inclusive society a reality.

The Routledge Handbook of Postcolonial Disability Studies Tsitsi Chataika, Dan Goodley, 2024-03-29. This book centres and explores postcolonial theory which looks at issues of power, economics, politics, religion and culture and how these elements work in relation to colonial supremacy. It argues that disability is a constitutive material presence in many postcolonial societies and that progressive disability politics arise from postcolonial concerns. By drawing these two subjects together, this handbook challenges oppression, voicelessness, stereotyping, undermining neo colonisation and postcolonisation and bridges binary debate between global North and the

global South The book is divided into eight sections Setting the Scene Decolonising Disability Studies Postcolonial Theory Inclusive Development Postcolonial Disability Studies and Disability Activism Postcolonial Disability and Childhood Studies Postcolonial Disability Studies and Education Postcolonial Disability Studies Gender Race and Religion Conclusion And comprised of 27 newly written chapters this book leads with postcolonial perspectives closely followed by an engagement with critical disability studies with the explicit aim of foregrounding these contributions pulling them in from the edges of empirical and theoretical work where they often reside in mainstream academic literature The book will be of interest to all scholars and students of disability studies and postcolonial studies as well as those working in sociology literature and development studies

Embodied Inequalities in Disability and Development Hisayo Katsui, Virpi Mesiäislehto, 2022-04-08. This book highlights the embodied knowledge of persons with disabilities as a vital resource for understanding equality without taking disability and development for granted. The perspective of embodied inequality offers alternative ways to comprehend our normality as until now the notion of normality has too frequently excluded persons with disabilities and their perspectives. Disability inclusion has never been as important as it is today in the development discourse yet systematic discrimination against people due to their disabilities persists. To address this, the link between theories and practices is strengthened in this book. Through using different contexts in the different book chapters, the readers are informed of how profoundly inequalities are embedded in our society and pronounced as embodied experiences of persons with disabilities. The chapters are written not only by academics but also by disability activists and NGO representatives. The chapters focus on disabilities and development as embodied inequalities manifested at different levels including theory, law and policy, and practice. In conclusion, the book presents 6 As as lessons learned from decolonial understanding and conceptions of embodied inequalities in different contexts of disability and development: Availability, Affordability, Accessibility, Accountability, Assistance, and Affection.

Project(ing) Human: Representations of Disability in Science Fiction Courtney Stanton, 2023-05-30. This edited volume examines representations of disability within popular science fiction using examples from television, film, literature, and gaming to explore how the genre of science fiction shapes cultural understanding of disability experience. Science fiction texts typically grapple with concepts such as transhumanism, embodiment, and autonomy more directly than do those of other genres. In doing so, they raise significant questions about the experience of disability. More broadly, they often convey the place of disability in not only the future but also the world of today. Through critical research, the chapters within this interdisciplinary collection explore what science fiction texts convey about the value of disability, whether it be through disabled characters, biotechnologies, or more broadly, conceptions of an idealized future. Chapters are grouped thematically and include discussions of the intersections of disability with other identity groups, the interplay of disability and market/capitalist value, and how disability shapes current and future definitions of humanness, agency, and autonomy. This full volume builds on current research regarding the relationship of disability studies to the science fiction genre by exploring new themes and contemporary media to aid as an instructional tool for scholars in fields of disability studies, science fiction literature, and media studies.

Research Methods for the Marginalized Staci B. Smith, Brian G. Smith, 2025-07-18. This edited volume explores how to effectively and ethically conduct social science research and work with marginalized and vulnerable populations. Many researchers find themselves unprepared for the challenges of studying or working with populations that may be outside their personal expectations and experiences affecting their ability to

accurately represent the lived experiences of marginalized and vulnerable communities Written by a diverse group of international scholars within the fields of strategic communication and communication studies this volume provides real world insights from researchers who not only have direct experience working with marginalized populations but many of whom are members of these communities Imperatives include critical lessons for access and accessibility in research Contributors draw on their own studies to guide readers through the main phases of research including study design data collection and data analysis The volume is especially suited as a supplementary text for researchers and students studying qualitative research methods in strategic communication and communication studies

Visual Impairment and Work Sally French, 2017-02-17 This book traces the development of paid work for visually impaired people in the UK from the 18th century to the present day It gives a voice to visually impaired people to talk about their working lives and documents the history of employment from their experience an approach which is severely lacking in the current literature about visual impairment and employment By analysing fifty in depth face to face interviews with visually impaired people talking about their working lives featuring those who have worked in traditional jobs such as telephony physiotherapy and piano tuning to those who have pursued more unusual occupations and professions and grouping them according to occupation and framed by documentary historical research these stories can be situated in their broader political economic ideological and cultural contexts The themes that emerge will help to inform present day policy and practice within a context of high unemployment amongst visually impaired people of working age It is part of a growing literature which gives voice to disabled people about their own lives and which adds to the growing academic discipline of disability studies and the empowerment of disabled people

Disability Studies Dan Goodley, 2024-11-01 What if disability isn't a problem but a resource This updated edition of a classic text in the field of disability studies interrogates the commonly held view that disability is something that needs to be cured or eradicated It shows us how disability can challenge our thinking and help us to imagine a more socially just society offering an engaging introduction to a diverse and globally expanding subject Taking an interdisciplinary approach this text will be of interest to undergraduates graduates and researchers across the social sciences Making the case that disability is much more than just impairment this book uncovers the ways in which disabled people are challenging discrimination and marginalisation Ranging across topics such as health activism and education this book asks questions about the ways in which society tends to understand disability and offers alternative explanations that are more exciting radical and transformative

The Wounded Self Nina Schmidt, 2018 Takes the recent wave of German autobiographical writing on illness and disability seriously as literature demonstrating the value of a literary disability studies approach

Concise Encyclopedia of Applied Ethics in the Social Sciences Tuija Takala, Matti Häyry, 2024-04-12 Covering a vast array of disciplines this prescient Encyclopedia analyzes the many roles that applied ethics plays in the social sciences Entries scrutinize the various manifestations of ethics across a range of disciplines and subdisciplines such as animal studies

criminology and global health **Disabling Barriers - Enabling Environments** John Swain, Sally French, Colin Barnes, Carol Thomas, 2013-11-10 Since it was first published in 1993 *Disabling Barriers Enabling Environments* has established itself as essential reading for anyone coming to the subject of disability studies The book tackles a wide range of issues in numerous succinct chapters written by contributing authors many of whom are disabled themselves From the outset the chapters take a multidisciplinary and international approach The third edition is made up of 42 chapters 15 of which are completely new to this edition including Early seminal writings in disabled studies Death and dying Psychology Hate crime and the criminal justice system Sport Psycho emotional disablism and internal oppression This seminal textbook conveys the continuing developments in the lives and experiences of disabled people It is valuable reading for students and professionals in the fields of social work sociology social policy health and nursing as well as disabled people *Animated Film and Disability* Slava Greenberg, 2023-02-07 While many live action films portray disability as a spectacle crip animation a genre of animated films that celebrates disabled people s lived experiences uses a variety of techniques like clay animation puppets pixilation and computer generated animation to represent the inner worlds of people with disabilities Crip animation has the potential to challenge the ableist gaze and immerse viewers in an alternative bodily experience In *Animated Film and Disability* Slava Greenberg analyzes over 30 animated works about disabilities including *Rocks in My Pockets* *An Eyeful of Sound* and *A Shift in Perception* He considers the ableism of live action cinematography the involvement of filmmakers with disabilities in the production process and the evocation of the spectators senses of sight and hearing consequently subverting traditional spectatorship and listenership hierarchies In addition Greenberg explores physical and sensory accessibility in theaters and suggests new ways to accommodate cinematic screenings Offering an introduction to disability studies and crip theory for film media and animation scholars *Animated Film and Disability* demonstrates that crip animation has the power to breach the spectator s comfort evoking awareness of their own bodies and in certain cases their social privileges
