Management with Online Study Tools 12 Months Danny Samson, Timothy Donnet, Richard L. Daft, 2017-10-25

Samson Daft Donnet's Management is a robust foundation text providing a balance of broad theoretical content with an engaging easy to understand writing style. It covers the four key management functions: planning, organising, leading, and controlling, conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media, and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real life local and international examples showcase the ongoing changes in the management world. Focusing on a skills approach, they bring concepts to life for students, supporting motivation, confidence, and mastery. Each part concludes with a contemporary continuing case study focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

Popular Science, 2002-12 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

[Metaprogramming with Python](#) Sulekha Aloor Ravi, 2022-09-09 A practical approach to metaprogramming with real world examples that enables the development of advanced frameworks, libraries, and applications using Python. Key Features: Learn applied metaprogramming through a simple step by step approach. Work with easily understandable examples and explanations that take you deep into the theory of metaprogramming. Get practical experience in writing reusable code with real world examples. Book Description: Effective and reusable code makes your application development process seamless and easily maintainable. With Python, you will have access to advanced metaprogramming features that you can use to build high performing applications. The book starts by introducing you to the need and applications of metaprogramming before navigating the fundamentals of object oriented programming. Next, you will learn about simple decorators, work with metaclasses, and later focus on introspection and reflection. You'll also delve into generics and typing before defining templates for algorithms. As you progress, you will understand your code using abstract syntax trees and explore method resolution order. This Python book also shows you how to create your own dynamic objects before structuring the objects through design patterns. Finally, you will learn simple code generation techniques along with discovering best practices and eventually building your own applications. By the end of this learning journey, you'll have acquired the skills and confidence you need to design and build reusable high performing applications that can solve real world problems. What you will learn: Understand the programming paradigm of metaprogramming and its need. Revisit the fundamentals of object oriented programming. Define decorators and work with metaclasses. Employ introspection and reflection on your code. Apply generics, typing, and templates to enhance your code. Get to grips with the structure of your code through abstract syntax trees and the behavior through method resolution.
