The Nervous System

The nervous system is an extremely complex network consisting of nerve cells and supporting structures that together throughout the human body. The main primary cells of the nervous system are neurons that actually carry and carry information, and glial cells that support the neurons. The nervous system is basically set at hierarchical organization under functional organization.

Central Nervous System

The central nervous system, or CNS, is made up of the brain and spinal cord. The brain is the most complex part of the nervous system. The brain is the control center of the body and is located within the protective hard skull. Layers of meningeal membranes and cerebrospinal fluid also protect the CNS. The spinal cord extends from the brainstem through the vertebral column. It has an S-shaped curve to the spinal cord, and a part of the spinal cord, called the cauda equina, extends from the lower back into the body.

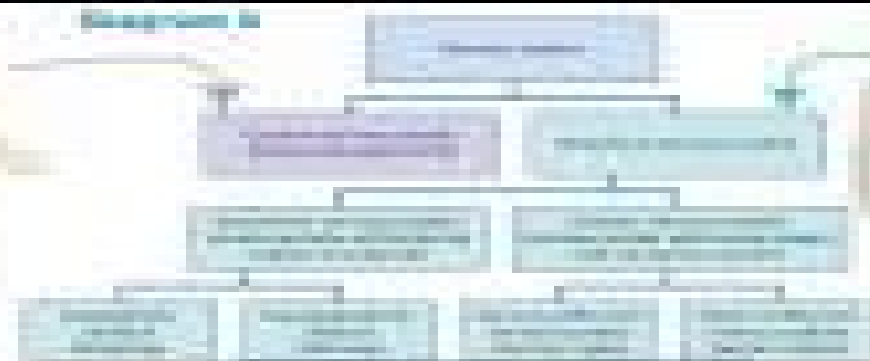

Peripheral Nervous System

There are all parts of nervous system that make up the nervous system. The main central part, and they make up the peripheral nervous system or PNS. The PNS is made up of sensory neurons that are capable of receiving stimuli, sensory neurons that are capable of responding to stimuli. For example, sensory neurons in the eye and tongue receive light stimuli and taste receptors are associated to neurons that transmit information.

The PNS is divided into the somatic and autonomic nervous systems. The somatic nervous system is divided into the sympathetic and parasympathetic nervous systems. The sympathetic nervous system is the part of the nervous system that is responsible for the "fight or flight" response. The parasympathetic nervous system is the part of the nervous system that is responsible for the "rest and digest" response. The sympathetic nervous system is the part of the nervous system that is responsible for the "fight or flight" response. The parasympathetic nervous system is the part of the nervous system that is responsible for the "rest and digest" response.

The Brain

The brain is the most complex part of the nervous system. It is made up of billions of neurons and supporting cells. The brain is divided into two main parts: the cerebrum and the cerebellum. The cerebrum is the part of the brain that is responsible for the majority of the brain's functions. It is divided into two halves: the left hemisphere and the right hemisphere. The cerebellum is the part of the brain that is responsible for coordination and balance. It is located at the back of the brain, below the cerebrum. The brain is also made up of billions of glial cells, which are supporting cells that help the neurons to function. The brain is the most important part of the nervous system, and it is the part of the nervous system that is responsible for the majority of the brain's functions.
