Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development,1999 **AI and IOT in Renewable Energy** Rabindra Nath Shaw,Nishad Mendis,Saad Mekhilef,Ankush Ghosh,2021-05-12 This book presents the latest research on applications of artificial intelligence and the Internet of Things in renewable energy systems Advanced renewable energy systems must necessarily involve the latest technology like artificial intelligence and Internet of Things to develop low cost smart and efficient solutions Intelligence allows the system to optimize the power thereby making it a power efficient system whereas Internet of Things makes the system independent of wire and flexibility in operation As a result intelligent and IOT paradigms are finding increasing applications in the study of renewable energy systems This book presents advanced applications of artificial intelligence and the internet of things in renewable energy systems development It covers such topics as solar energy systems electric vehicles etc In all these areas applications of artificial intelligence methods such as artificial neural networks genetic algorithms fuzzy logic and a combination of the above called hybrid systems are included The book is intended for a wide audience ranging from the undergraduate level up to the research academic and industrial communities engaged in the study and performance prediction of renewable energy systems The Dynamics of Connection David C. Bell,2012-07-10 The Dynamics of Connection How Evolution and Biology Create Caregiving and Attachment describes the logic of giving love trust and nurturance Bowlby s theory of attachment provides an excellent starting point for an explanation of nurturance but there are some limitations in this theory especially its tendency to minimize the caregiving side of the relationship The book builds on and extends Bowlby s theory by examining the evolutionary evidence for both attachment and caregiving the origins of which can be seen in the earliest mammals It describes neurobiological research that has identified the brain circuits that underlie caregiving and attachment The book then describes a theory of relationships based on these neurobiological circuits and the resulting human desire to give and receive emotional contact warmth and support The theory details the emotional logic of this relationship process The proactive connection process caregiving characteristic of parents involves a growing capacity for both empathy and responsibility In the receptive process attachment trust grows from the experience of being cared for and nurtured These processes coexist alongside other motivations with which they interact The Dynamics of Connection introduces a view of the dyadic social psychology of connection that underlies both parent child and close adult relationships It provides a description and explanation of parental and adult nurturance It gives a long needed account of the origins of social norms of parenting While building on the foundation of attachment theory David Bell brings together new insights from both evolutionary theory and neurobiology to deepen our understanding of caregiving and attachment **Energy**
